After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019 2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with

Appalachian Journal ,2007 A regional studies review **A Protest History of the United States** Gloria J. Browne-Marshall,2025-04-22 Exploring 400 years of protest and resistance in US history and what the unsung heroes of social movements past can teach us about navigating our chaotic world In this timely new book in Beacon s successful ReVisioning History series professor Gloria Browne Marshall delves into the history of protest movements and rebellion in the United States Beginning with Indigenous peoples resistance to European colonization and continuing through to today s climate change demonstrations Browne Marshall expands how to think about protest through sharing select historical moments and revealing the role of key players involved in those efforts Drawing upon legal documents archival material government documents and secondary sources *A Protest History of the United States* gives voice to those who pushed back against the mistreatment of others themselves and in some instances planet Earth Browne Marshall highlights stories of individuals from all walks of life backgrounds and time periods who helped bring strong attention to their causes Those examples of protest include those of Wahunsenacock more commonly known to history as Chief Powhatan who took on English invaders in pre colonial America in 1607 legendary boxer Muhammad Ali s refusal to fight in Vietnam and appealed all the way to the US Supreme Court and David Buckel LGBTQ rights lawyer and environmental activist who protested against fossil fuels by committing self immolation in 2018 Regardless of whether these protests accomplished their end goals Browne Marshall reminds us that not only is dissent meaningful and impactful but is an essential tool for eliciting long lasting change New Energies Stephen G. Gross,Andrew Needham,2023-02-28 Over the past 250 years energy transitions have

occurred repeatedly the rise of coal in the nineteenth century the explosion of oil in the twentieth century the nuclear utopianism of the 1950s and 1960s These transitions have been as revolutionary as any political or economic upheaval and they required changes in infrastructure and behavior Yet new energies never wholly replace old ones This volume historicizes energy production and consumption while demonstrating how energy use has reshaped everything from social life and economic organization to political governance It foregrounds the importance of energy for big historical questions about capitalism democracy inequality the environment and identity and it argues that energy systems themselves merit attention as key agents of historical change Given the urgency of climate change and the central position that energy plays in causing and potentially solving global warming this volume engages history as a discipline in the debate over what may be most monumental energy transition of all time the shift away from fossil fuels

Matewan Before the Massacre Rebecca J. Bailey, 2008 On May 19 1920 gunshots rang through the streets of Matewan West Virginia in an event soon known as the Matewan Massacre Most historians of West Virginia and Appalachia see this event as the beginning of a long series of tribulations known as the second Mine Wars But was it instead the culmination of an even longer series of proceedings that unfolded in Mingo County dating back at least to the Civil War *Matewan Before the Massacre* provides the first comprehensive history of the area beginning in the late eighteenth century continuing up to the Massacre It covers the relevant economic history including the development of the coal mine industry and the struggles over land ownership labor history including early efforts of unionization transportation history including the role of the N political history including the role of political factions in the county's two major communities Matewan and Williamson and the impact of the state's governors and legislatures on Mingo County After Coal Tom Hansell, 2018 What happens when fossil fuels run out How do communities and cultures survive Central Appalachia and south Wales were built to extract coal and faced with coal's decline both regions have experienced economic depression labor unrest and out migration *After Coal* focuses on coalfield residents who chose not to leave but instead remained in their communities and worked to build a diverse and sustainable economy It tells the story of four decades of exchange between two mining communities on opposite sides of the Atlantic and profiles individuals and organizations that are undertaking the critical work of regeneration The stories in this book are told through interviews and photographs collected during the making of *After Coal* a documentary film produced by the Center for Appalachian Studies at Appalachian State University and directed by Tom Hansell Considering resonances between Appalachia and Wales in the realms of labor environment and movements for social justice the book approaches the transition from coal as an opportunity for marginalized people around the world to work toward safer and more egalitarian futures **Working Class Radicals** Frederick A. Barkey, 2012 *Working Class Radicals* The Socialist Party in West Virginia 1898 1920 examines the rise and fall of organized socialism in West Virginia through an exploration of the demographics of membership oral interview material gathered in the 1960s from party members and the collapse of the party in the wake of

the Paint Creek Cabin Creek coal mining strike of 1912 The first local branch of the West Virginia Socialist Party was established in Wheeling in 1901 and by 1914 several thousand West Virginians were dues paying members of local branches By 1910 local Socialists began to elect candidates to office and in 1912 more than 15 000 West Virginian voters cast their ballots for Socialist presidential candidate Eugene Debs The progress that West Virginia socialists achieved on the electoral front was a reflection of the party s strategy of increasing class consciousness by working with existing unions to build the power of the labor movement The party appealed to a fairly broad cross section of wage earners and its steady growth also owed much to the fact that many members of the middle class were attracted to the cause Several factors combined to send the party into rapid decline most importantly deep fissures between class and craft factions of the party and 1915 legislation making third party political participation difficult Working Class Radicals offers insight into the various internal and external forces that doomed the party and serves as a cautionary tale to contemporary political leaders and organizers They'll Cut Off Your Project Huey Perry,2011 In old England if a king didn t like you he would cut off your head Now if they don t like you they ll cut off your project As the Johnson Administration initiated its war on poverty in the 1960s the Mingo County Economic Opportunity Commission project was established in southern West Virginia Huey Perry a young local history teacher was named the director of this program and soon he began to promote self sufficiency among low income and vulnerable populations As the poor of Mingo County worked together to improve conditions the local political infrastructure felt threatened by a shift in power Bloody Mingo County known for its violent labor movements corrupt government and the infamous Hatfield McCoy rivalry met Perry s revolution with opposition and resistance In They ll Cut Off Your Project Huey Perry reveals his efforts to help the poor of an Appalachian community challenge a local regime He describes this community s attempts to improve school programs and conditions establish cooperative grocery stores to bypass inflated prices and expose electoral fraud Along the way Perry unfolds the local authority s hostile backlash to such change and the extreme measures that led to an eventual investigation by the FBI They ll Cut Off Your Project chronicles the triumphs and failures of the war on poverty illustrating why and how a local government that purports to work for the public s welfare cuts off a project for social reform
