support for a forensic approach to photojournalism ethics The book situates this debate within questions of relativism over what is moral and normative debates over what is journalistic alongside technical debates as to what is possible to underpin a discussion of photojournalism as an ethical moral and societally important journalistic practice Including detailed comparative analyses of codes of ethics examination of controversial cases and a study of photojournalism ethics as applied in different newsrooms the book examines how ethical principles are applied by the global news media and explores the potential for constructive dialogue between different voices interested in pursuing the best version of photojournalism A targeted comprehensive and engaging book this is a valuable resource for academics researchers and students of photojournalism as well as philosophy communications and media studies more broadly Christian Ethics in a Technological Age Brian Brock,2010-06-28 Through close analysis of the historical and conceptual roots of modern science and technology Brian Brock here develops a theological ethic addressing a wide range of contemporary perplexities about the moral challenges raised by new technology **Air, the Environment and Public Health** Anthony Kessel,2006 Air the Environment and Public Health traces the theme of air and health from ancient civilisations to the present day The author explores the changing conceptions of air and health alongside historical developments in public health and critically examines contemporary problems conceptual scientific philosophical and ethical in public health theory and practice The first part surveys air and health in early civilisations as well as the nineteenth century debates around miasma and evolution The second part explores the history of smoke pollution and health Part three examines philosophical issues around modern air pollution epidemiology and part four looks at climate change and ethical frameworks in public health The book is a unique blend of public health science history of medicine ethics and philosophy It will be of interest to those working or studying in public health environmental health medicine history of medicine environmental philosophy and medical ethics **The Age of Understanding; Or, Americanism, the Standard of World Nationalism** Leonard Stuart,1922 **Moderation and the Mean in the Literature of Spain's Golden Age** Richard Rabone,2023 A sustained analysis of the reception of the Aristotelian golden mean in early modern Spanish literature Studying works of three canonical authors Garcilaso Calder n Graci n it argues that the ethical credo of moderation was an important part of the classical inheritance on which Golden Age authors frequently drew **Experimental Histories** Hannah Weaver,2024-08-15 In Experimental Histories Hannah Weaver examines the medieval practice of interpolation inserting material from one text into another which is often categorized as being a problematic inauthentic phenomenon akin to forgery and pseudepigraphy Instead Weaver promotes interpolation as the signature form of medieval British historiography and a vehicle of historical theory arguing that some of the most novel concepts of time in medieval historiography can be found in these altered narratives of the past For Weaver historiographical interpolation constitutes the traces of active experimentation with how best to write history particularly the history of Britain Historians in twelfth and thirteenth century Britain recognized the difficulty of enfolding complex events into a linear

chronology and embraced innovative textual methods of creating history Focusing on the Brut tradition but also analyzing the long history of interpolated historiography including the Bayeux Embroidery Experimental Histories offers a new interpretation of generic remixing in medieval writing about the past Drawing on both manuscript studies and the new formalism it shows that the practice of inserting materials from romance and hagiography allowed creative revisers to explore how lived events relate to passing time By embracing interpolation Weaver provides lively insights into the ways that time becomes history and human actors experience time
