Nature as Reason Jean Porter, 2005 This noteworthy book develops a new theory of the natural law that takes its orientation from the account of the natural law developed by Thomas Aquinas as interpreted and supplemented in the context of scholastic theology in the twelfth and thirteenth centuries Though this history might seem irrelevant to twenty first century life Jean Porter shows that the scholastic approach to the natural law still has much to contribute to the contemporary discussion of Christian ethics Aquinas and his interlocutors provide a way of thinking about the natural law that is distinctively theological while at the same time remaining open to other intellectual perspectives including those of science In the course of her work Porter examines the scholastics assumptions and beliefs about nature Aquinas s account of happiness and the overarching claim that reason can generate moral norms Ultimately Porter argues that a Thomistic theory of the natural law is well suited to provide a starting point for developing a more nuanced account of the relationship between specific beliefs and practices While Aquinas s approach to the natural law may not provide a system of ethical norms that is both universally compelling and detailed enough to be practical it does offer something that is arguably more valuable namely a way of reflecting theologically on the phenomenon of human morality

Moral Status Mary Anne Warren, 1997-11-13 Mary Anne Warren explores a theoretical question which lies at the heart of practical ethics what are the criteria for having moral status In other words what are the criteria for being an entity towards which people have moral obligations Some philosophers maintain that there is one intrinsic property for instance life sentience humanity or moral agency Others believe that relational properties such as belonging to a human community are more important In Part I of the book Warren argues that no single property can serve as the sole criterion for moral status instead life sentience moral agency and social and biotic relationships are all relevant each in a different way She presents seven basic principles each focusing on a property that can in combination with others legitimately affect an agent s moral obligations towards entities of a given type In Part II these principles are applied in an examination of three controversial ethical issues voluntary euthanasia abortion
