Online Choice Richard Harper:

Choice Richard Harper, Dave Randall, Wes Sharrock, 2017-09-05 We make decisions every day Yet we are sometimes perplexed by these decisions and the decisions of others To complicate things further we live in an age where there are more things to choose from than ever before the Internet is transforming our choices and making us more accountable for them what we choose is recorded modelled and used to predict our future behaviour So are we in a position to make better choices today than we were a decade ago Certainly there are some who believe so Psychologists claim we are subject to hidden mental processes that lead us to one thing rather than another economists offer predictions about what people will buy and some philosophers claim that our choices echo our evolutionary past Are these claims merited Do they reflect the beginnings of a new science of choice This book offers a critical overview of these and other claims showing where they are justified and where they are exaggerated It will be an essential reference for anyone interested in whether science can help us to understand both the ways people make choices in their everyday lives and how these may be changing *Nudging Choices Through Media* James Katz, Katie Schiepers, Juliet Floyd, 2023-06-30 This book addresses the growing use of computerized systems to influence people's decisions without their awareness a significant but underappreciated sea change in the way the world works To assess these systems this volume's contributors explore the philosophical and ethical dimensions of algorithms that guide people's behavior by nudging them toward choices preferred by systems architects Particularly in an era of heightened awareness of bias and discrimination these systems raise profound concerns about the morality of such activities This volume brings together a diverse array of thinkers to critically examine these nudging systems Not only are high level perspectives presented but so too are of those who use them on a day to day basis While algorithmic nudging can produce benefits for users there are also many less obvious costs to using such systems costs that require examination and deliberation This book is a major step towards delineating these concerns and suggesting ways to provide a sounder basis for future policies for algorithms It should be of interest to system designers public policymakers scholars and those who wonder more deeply about the nudges they receive from various websites and on their phones **Trust, Computing, and Society** Richard Harper, 2014-02-28 Do new forms of connection need more regulation and control These fascinating essays explore the question from technical socio philosophical and design perspectives Digital Media, Youth, and Credibility Miriam J. Metzger, Andrew J. Flanagin, 2008 The difficulties in determining the quality of information on the Internet in particular the implications of wide access and questionable credibility for youth and learning Today we have access to an almost inconceivably vast amount of information from sources that are increasingly portable accessible and interactive The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history This brings an infinite number of opportunities for learning social connection and entertainment But at the same time the origin of information its quality and its veracity are often difficult to assess This

volume addresses the issue of credibility the objective and subjective components that make information believable in the contemporary media environment The contributors look particularly at youth audiences and experiences considering the implications of wide access and the questionable credibility of information for youth and learning They discuss such topics as the credibility of health information online how to teach credibility assessment and public policy solutions Much research has been done on credibility and new media but little of it focuses on users younger than college students Digital Media Youth and Credibility fills this gap in the literature Contributors Matthew S Eastin Gunther Eysenbach Brian Hilligoss Frances Jacobson Harris R David Lankes Soo Young Rieh S Shyam Sundar Fred W Weingarten *Fundamentals of Management with Online Study Tools 12 Months* Danny Samson, Richard L Daft, Timothy Donnet, 2017-12-05 Samson Daft Donnet s
