Online Right Self Determination Under International Law:

The Right to Self-determination Under International Law Milena Sterio, 2013 This book proposes a novel theory of self determination the Rule of the Great Powers This book argues that traditional legal norms on self determination have failed to explain and account for recent results of secessionist self determination struggles While secessionist groups like the East Timorese the Kosovar Albanians and the South Sudanese have been successful in their quests for independent statehood other similarly situated groups have been relegated to an at times violent existence within their mother states Thus Chechens still live without significant autonomy within Russia and the South Ossetians and the Abkhaz have seen their conflicts frozen because of the peculiar geo political equilibrium of power within the Caucasus region The Rule of the Great Powers which asserts that only those self determination seeking entities which enjoy the support of the majority of the most powerful states the Great Powers will ultimately have their rights to self determination fulfilled The Great Powers potent military economic and political powerhouses such as the United States China Russia Japan the United Kingdom France Germany and Italy often dictate self determination outcomes through their influence in global affairs Issues of self determination in the modern world can no longer be effectively resolved through the application of traditional legal rules rather resort must be had to novel theories such as the Rule of the Great Powers This book will be of particular interest to academics and students of law political science and international relations

The Human Right to Democracy in Multilevel Systems at a Time of Democratic Backsliding: Global, Regional and European Union Perspectives Thomas Giegerich, 2025-09-30 This open access book takes stock of the current situation of the human right to democracy in multilevel systems of government at a time of renewed struggles with antidemocratic forces democratic backsliding It tries to answer three questions 1 Is there a human right to democracy in contemporary global and regional international law as well as European Union law and what consequences does that have for the States governmental structure top down perspective on national democracy 2 Does the human right to democracy also extend to decision making at the international and supranational level bottom up perspective on international supranational democracy 3 What is the relation between national democracy and international democracy and the corresponding human entitlements interdependence perspective The first part of an answer to these questions derives from the elements of democracy proclaimed by the United Nations as a universal value The second part results from an investigation of the national and international democratic ingredients of the right of self determination of peoples whose recognition and codification is the mainstay of the human rights revolution since 1945 The third part is added by a survey and comparison of the various democratic rights included in the global and regional human rights treaties that constitute the subjective cornerstones of democracy The fourth part is devoted to analysing the EU as exemplary but imperfect multilevel democracy In all these parts the enforcement of democratic entitlements are also discussed In the fifth part conclusions will be drawn The book is addressed to international and EU law experts as well as political scientists

Consent and Rights Stephen Young, 2019-11-19 Analysing how Indigenous Peoples come to be identifiable as bearers of

human rights this book considers how individuals and communities claim the right of free prior and informed consent FPIC as Indigenous peoples The basic notion of FPIC is that states should seek Indigenous peoples consent before taking actions that will have an impact on them their territories or their livelihoods FPIC is an important development for Indigenous peoples their advocates and supporters because one might assume that where states recognize it Indigenous peoples will have the ability to control how non Indigenous laws and actions will affect them But who exactly are the Indigenous peoples that are the subjects of this discourse This book argues that the subject status of Indigenous peoples emerged out of international law in the late 1970s and early 1980s Then through a series of case studies it considers how self identifying Indigenous peoples scholars UN institutions and non government organizations NGOs dispersed that subject status and associated rights discourse through international and national legal contexts It shows that those who claim international human rights as Indigenous peoples performatively become identifiable subjects of international law but further demonstrates that this does not however provide them with control over or emancipation from a state based legal system Maintaining that the discourse on Indigenous peoples and international law itself needs to be theoretically and critically re appraised this book problematises the subject status of those who claim Indigenous peoples rights and the role of scholars institutions NGOs and others in producing that subject status Squarely addressing the limitations of international human rights law it nevertheless goes on to provide a conceptual framework for rethinking the promise and power of Indigenous peoples rights Original and sophisticated the book will appeal to scholars activists and lawyers involved with indigenous rights as well as those with more general interests in the operation of international law
