Online Rsmeans Electrical Cost Data 2016:

Sustainable Wastewater Treatment Systems José Alberto Herrera-Melián, 2020-12-28 Water is one of the main concerns of modern societies. Climate change will significantly complicate access to quality water for millions of people worldwide and the threat of contamination of aquatic resources by poor wastewater management is real and growing fast. Therefore, there is an urgent need to develop efficient and sustainable wastewater treatment methods. Although there are numerous water treatment methods, not all of them are equally sustainable, be it environmentally, economically, or ethically. For this book, some of the latest advances in sustainable wastewater treatments were collected and 13 articles selected. The selected articles deal with aspects such as the removal of nanoparticles, the applicability of constructed wetlands, the recovery removal of wastewater, the use of low cost bio sorbents, the optimization of activated sludge, the application of advanced oxidation technologies, and the modeling of reverse osmosis systems. This book will give the reader an idea of the latest trends in the sector of sustainable wastewater treatment.

RSMeans Electrical Cost Data Rsmeans, 2015-11-02 The Electrical Cost Data 2016 Book. Want to simplify the process of estimating electrical construction projects? This versatile reference guide gives you the most up to date cost information available to tackle any kind of electrical estimate. Improve your estimates with this all inclusive guide including Resources for all types of estimators including designers, engineers, and contractors. Cost saving tips and ideas. Cost recommendations for both designing and planning electrical work. Comprehensive cost entries from high voltage transmission lines to residential wiring.

Life-Cycle Civil Engineering: Innovation, Theory and Practice Airong Chen, Xin Ruan, Dan M. Frangopol, 2021-02-26 Life Cycle Civil Engineering Innovation Theory and Practice contains the lectures and papers presented at IALCCE2020, the Seventh International Symposium on Life Cycle Civil Engineering held in Shanghai, China, October 27-30, 2020. It consists of a book of extended abstracts and a multimedia device containing the full papers of 230 contributions, including the Fazlur R. Khan lecture, eight keynote lectures, and 221 technical papers from all over the world. All major aspects of life cycle engineering are addressed with special emphasis on life cycle design, assessment, maintenance, and management of structures and infrastructure systems under various deterioration mechanisms due to various environmental hazards. It is expected that the proceedings of IALCCE2020 will serve as a valuable reference to anyone interested in life cycle of civil infrastructure systems, including students, researchers, engineers, and practitioners from all areas of engineering and industry.
