Monocultures Of The Mind Perspectives Text Only By Vshiva:

Monocultures of the Mind Vandana Shiva, 1993-02 Vandana Shiva has established herself as a leading independent thinker and voice for the South in that critically important nexus where questions of development strategy the environment and the position of women in society coincide In this new volume she brings together her thinking on the protection of biodiversity the implications of biotechnology and the consequences for agriculture of the global pre eminence of Western style scientific knowledge In lucid and accessible fashion she examines the current threats to the planet s biodiversity and the environmental and human consequences of its erosion and replacement by monocultural production She shows how the new Biodiversity Convention has been gravely undermined by a mixture of diplomatic dilution during the process of negotiation and Northern hi tech interests making money out of the new biotechnologies She explains what these technologies involve and gives examples of their impact in practice She questions their claims to improving natural species for the good of all and highlights the ethical and environmental problems posed Underlying her arguments is the view that the North s particular approach to scientific understanding has led to a system of monoculture in agriculture a model that is not being foisted on the South displacing its societies ecologically sounder indigenous and age old experiences of truly sustainable food cultivation forest management and animal husbandry This rapidly accelerating process of technology and system transfer is impoverishing huge numbers of people disrupting the social systems that provide them with security and dignity and will ultimately result in a sterile planet in both North and South In a policy intervention of potentially great significance she calls instead for a halt at international as well as local level to the aid and market incentives to both large scale destruction of habitats where biodiversity thrives and the introduction of centralised homogenous systems of cultivation

Vegetables and Fruits: A Guide to Heirloom Varieties and Community-Based Stewardship. Volume 1, Annotated Bibliography, Special Reference Briefs Series No. SRB 98-05, September 1998 ,1998 Reclaiming Opportunities for Effective Teaching Mary Ellen Dunn, 2016-01-07 This book examines the increased standardization and management of community college course outlines in Ontario and the associated decline in the ability of college professors to effectively educate their students Dunn tracks the changes of increased pressure from corporations to privatize public services and make them for profit friendly Interviews of program faculty who have recently been forced to use course outlines for the first time along with critical analyses of a sample course outline and a series of union related texts illuminate the issue Dunn attributes the shift of power in community colleges to various factors which include the ideological work college employees do to support global finance capital the managerial labor which establishes a course outline the textual duties that faculty members facilitate to set up their own ruling and the performance work that faculty members do to execute the textual rules of their prescriptive course outline work In order to rectify the harmful effects of the new standardized and supervised curriculum Dunn identifies areas where effective teaching and learning can be reclaimed Special Reference Briefs ,1983

The Digital Humanist Domenico Fiormonte, Teresa Numerico, Francesca Tomasi, 2015 This book offers a critical introduction to the core technologies underlying the Internet from a humanistic perspective It provides a cultural critique of computing technologies by exploring the history of computing and examining issues related to writing representing archiving and searching The book raises awareness of and calls for the digital humanities to address the challenges posed by the linguistic and cultural divides in computing the clash between communication and control and the biases inherent in networked technologies A common problem with publications in the Digital Humanities is the dominance of the Anglo American perspective While seeking to take a broader view the book attempts to show how cultural bias can become an obstacle to innovation both in the methodology and practice of the Digital Humanities Its central point is that no technological instrument is culturally unbiased and that all too often the geography that underlies technology coincides with the social and economic interests of its producers The alternative proposed in the book is one of a world in which variation contamination and decentralization are essential instruments for the production and transmission of digital knowledge It is thus necessary not only to have spaces where DH scholars can interact such as international conferences THATCamps forums and mailing lists but also a genuine sharing of technological know how and experience This is a truly exceptional work on the subject of the digital Students and scholars new to the field of digital humanities will find in this book a gentle introduction to the field which I cannot but think would be good and perhaps even inspirational for them Its history of the development of machines and programs and communities bent on using computers to advance science and research merely sets the stage for an insightful analysis of the role of the digital in the way both scholars and everyday people communicate and conceive of themselves and others in written forms from treatises to credit card transactions Peter Shillingsburg The Digital Humanist is not simply a translation of the Italian book *L'umanista digitale* il Mulino 2010 but a new version tailored to an international audience through the improvement and expansion of the sections on social cultural and ethical problems of the most widely used methodologies resources and applications

Tangled Routes Deborah Barndt, 2008 Now in a thoroughly revised and updated edition Tangled Routes offers a vivid interdisciplinary examination of the global food system through the journey of a corporate tomato Through case studies in the three NAFTA countries Mexico the United States and Canada Deborah Barndt examines the dynamic relationships between production and consumption work and technology biodiversity and cultural diversity and health and environment The compelling stories of women workers along the tomato trail humanize her analysis of globalization taking into account the intersections of gender race class family status and north south relations

Vegetables and Fruits:

Annotated bibliography ,1998 Vegetables and Fruits ,1998 **Ethics of the Global Environment** Robin Attfield,2015-02-12 This fully updated and expanded textbook looks at issues including climate change sustainable development and biodiversity preservation and sensitively addresses global developments such as the Summits at Durban on climate and at Nagoya on biodiversity **A Critique of Postcolonial Reason** Gayatri Chakravorty Spivak,1999-06-28 Are the culture wars over When did they begin What is their relationship to gender struggle and the dynamics of class In her first full treatment of postcolonial studies a field that she helped define Gayatri Chakravorty Spivak one of the world s foremost literary theorists poses these questions from within the postcolonial enclave **Writing for an Endangered World** Lawrence Buell,2009-07-01 The environmental imagination does not stop short at the edge of the woods Nor should our understanding of it as Lawrence Buell makes powerfully clear in his new book that aims to reshape the field of literature and environmental studies Emphasizing the influence of the physical environment on individual and collective perception his book thus provides the theoretical underpinnings for an ecocriticism now reaching full power and does so in remarkably clear and concrete ways Writing for an Endangered World offers a conception of the physical environment whether built or natural as simultaneously found and constructed and treats imaginative representations of it as acts of both discovery and invention A number of the chapters develop this idea through parallel studies of figures identified with either natural or urban settings John Muir and Jane Addams Aldo Leopold and William Faulkner Robinson Jeffers and Theodore Dreiser Wendell Berry and Gwendolyn Brooks Focusing on nineteenth and twentieth century writers but ranging freely across national borders his book reimagines city and country as a single complex landscape *Framing Discourse on the Environment* Richard Alexander,2010-04-15 In this study Richard Alexander presents a series of original and empirically based case studies of the language and discourse involved in the discussion of environmental and ecological issues Relying upon a variety of different text types and genres including company websites advertisements press articles speeches and lectures Alexander interrogates how in the media press corporate and activist circles language is employed to argue for and propagate selected positions on the growing ecological crisis For example he asks How are ecological and environmental concerns articulated in texts What do we learn about ecological problems through texts from differing sources What language features accompany ecological discourse in differing contexts and registers Attention is especially directed at where this discourse comes into contact with business economic and political concerns *The Law of Complex Earth and Outer Space Systems* Elena Cirkovic,2025-03-17 This book offers a paradigm shifting exploration of lawmaking for the complex interactions between Earth systems and outer space Drawing on complex systems science posthuman approaches and plural ontologies the author proposes a reimagining of law and governance for the cosmic age Through the cosmolegal perspective this study embraces the inherent uncertainties and complexities of Earth space interactions From Arctic methane craters to orbital debris the book weaves together scientific insights landscape architecture legal theory and doctrine to address pressing environmental

challenges that span Earth and beyond While legal scholarship has increasingly engaged with Earth System Science it typically treats outer space as distinct from Earth's environment However Earth's existence and complex systems are fundamentally intertwined with and emerge from outer space This book argues that a legal framework for Earth's systems needs to include outer space At its core the book advocates for a complexification of law calling for greater epistemic humility in legal thought and practice Thoughtful and provocative this work invites readers to reconsider fundamental assumptions about law nature and agency beyond the human in an era of planetary change The cosmolegal approach aims to shift legal imagination and understanding positioning human law as just one of many actors within the cosmos This original work will appeal to scholars of legal theory and environmental law as well as those interested in posthumanism ecology and materialism **Jacques Derrida** Zeynep Direk, Leonard Lawlor, 2002 **Conducting Research on Global**

Environmental Agreement-Making Hannah Hughes, Alice B. M. Vadrot, 2023-08-10 Global environmental negotiations have become central sites for studying the interaction between politics power and environmental degradation This book challenges what constitutes the sites actors and processes of negotiations beyond conventional approaches and provides a critical multidisciplinary and applied perspective reflecting recent developments such as the increase of actor diversity and the digitalisation of global environmental meetings It provides a step by step guide to the study of global environmental negotiations using accessible language and illustrative examples from different negotiation settings including climate change biodiversity and ocean protection It introduces the concept of agreement making to broaden understanding of what is studied as a site of negotiation illustrating how diverse methods can be applied to research the actors processes and order making It provides practical guidance and methodological tools for students researchers and practitioners participating in global environmental agreement making One of a series of publications associated with the Earth System Governance Project www.cambridge.org/earth-system-governance **Artists and the Practice of Agriculture** Silvia Bottinelli, 2023-07-31

Artists and the Practice of Agriculture maps out examples of artistic practices that engage with the aesthetics and politics of gathering food growing edible and medicinal plants and interacting with non human collaborators In the hands of contemporary artists farming and foraging become forms of visual and material language that convey personal and political meanings This book provides a critical analysis of artistic practices that model alternative food systems It presents rich academic insights as well as 16 conversations with practicing artists The volume addresses pressing issues such as the interconnectedness of human and other than human beings the weight of industrial agriculture the legacy of colonialism and the promise of place based and embodied pedagogies Through participatory projects the artists discussed here reflect on the links between past histories present challenges and future solutions for the food sovereignty of local and networked communities The book is an easy to navigate resource for readers interested in food studies visual and material cultures contemporary art ecocriticism and the environmental humanities **Environmental Education**, 2008-01-01 In

Environmental Education Identity Politics and Citizenship the editors endeavor to present views of environmental educators that focus on issues of identity and subjectivity and how narrated lives relate to questions of learning education politics justice and citizenship What is distinctive about this collection is that it highlights the views of Latin American scholars alongside those of scholars from Spain Canada New Zealand Taiwan South Africa Australia and U S The result is a philosophically nuanced reading of the complexities of environmental education that begins to reshape the landscape in terms of ethics ontology epistemology and politics The collection bears the stamp of the location of its contributors and strongly reflects an activist qualitative and ethnographic orientation that emphasizes the ground for action the identity of environmental actors and the contribution that education in all its forms can make to sustainability and the cause of the environment At the same time contributors go beyond simple slogans and ideologies to question the accepted truths of this rapidly emerging field Cover picture Edgar Gonz lez Gaudiano Siem Reap Cambodia December 2007 **Inhuman**
