More Magic 1:

Mathemagics: A Magical Journey Through Advanced Mathematics - Connecting More Than 60 Magic Tricks To High-level Math Ricardo V Teixeira, Jang-woo Park, 2020-05-29 This delightful book connects mathematical concepts in a dozen areas to magic tricks. Expositions of the mathematics precede description and analysis of the tricks. The expositions are too short for in-depth learning; the intent is to give sophomores a taste of the content and ideas of later mathematics courses. Each chapter features exercises on the mathematics and students can have fun practicing the tricks. *Mathematics Magazine* Teixeira and Park present over 60 different magic tricks while introducing students to high-level math areas. Readers will learn really interesting ideas that will better prepare them for future courses and help them find areas they might want to study deeper. And as a side effect, students will learn amazing magic tricks, century-old secrets and details from famous magicians and mathematicians. The material was written to quickly present key concepts in several mathematical areas in a direct way. Little or no proficiency in math is assumed. In fact, students do not require any Calculus knowledge. And since chapters are almost independent from each other, this book also works as an introduction to several other courses. Topics covered include mathematical proofs, probability, abstract algebra, linear algebra, mathematical computing, number theory, coding theory, geometry, topology, real analysis, numerical analysis, and history of math.

Exiting Nirvana Clara Claiborne Park, 2009-06-27 The author of *The Siege* provides readers with what is perhaps the finest exposition of a parent's decades-long experience with a child with autism. Jeffrey L. Geller, MD, MPH, Psychiatric Services

Exiting Nirvana details Clara Claiborne Park's continuing efforts to have her adult daughter Jessy develop as an artist and connect with our world. Park has been both mother and anthropologist recording verbal and social breakthroughs and setbacks, administering praise and succor. She describes the serene insularity of the autistic's Nirvana and observes collisions between the autistic and external worlds. She's urged Jessy to enter yet never entirely the extraordinary dailiness inhabited by nonautistic people. In incisive often exquisite prose, Park affords entry into Jessy's and her own remarkable journey between the two. Publishers Weekly: Beautifully written, a fascinating excursion into an otherworldly mind. The New York Times: Park's second book on her daughter Jessy, the first appeared in 1967 when Jessy was eight, is a perceptive, detailed and empathetic account, not of autism but of the experience of autism. A warm, levelheaded, neither overly optimistic nor overly glorified book that proves very rewarding. Booklist: This beautifully crafted portrait of an autistic adult artist includes color reproductions of Jessy's paintings with descriptions in her own handwriting. Library Journal: This beautifully written book is must reading and not only for those seeking an understanding of autism. Bernard Rimland, Director, The Autism Research Institute.

More Lives Than One Claude Bragdon, 2006-11-01 Few Americans have had as many creative lives as Claude Bragdon, who designed theatrical sets and churches, who dabbled in theosophy and the occult, who wrote about it all with spirit, passion and penetrating insight. Here, in delightfully effervescent prose, Bragdon tells the story of his life or lives. From his Personal Life: Born under the constellation Leo, the heart sign, I was never long out of love; to his Occult Life: I frightened my mother by declaring that I was the chosen vessel for the pouring out of a new revelation upon mankind. Bragdon is surprisingly frank, frequently hilarious and always wonderfully self-deprecating. First published in 1917, this is an intimate dispatch from a true American character. Other works by Bragdon available from Cosimo Classics: *The Beautiful Necessity*, *Architecture and Democracy*, *Episodes from An Unwritten History* and *A Primer of Higher Space*. The Fourth Dimension. American architect, stage designer and writer. CLAUDE FAYETTE BRAGDON 1866-1946 helped found the Rochester Architectural Club in the city where he made his greatest mark as a building designer with structures including Rochester Central Station, Rochester Institute of Technology and the First Universalist Church; he also designed Peterborough Bridge in Ontario. In later life, Bragdon worked on Broadway as scenic designer for 1930s productions of *Cyrano de Bergerac* and *Hamlet*, among others.
