Post-Apocalyptic Science Fiction Robert Yeates,2021-11-15 Visions of the American city in post apocalyptic ruin permeate
literary and popular fiction across print visual audio and digital media American Cities in Post Apocalyptic Science Fiction
explores the prevalence of these representations in American culture drawing from a wide range of primary and critical
works from the early twentieth century to today Beginning with science fiction in literary magazines before taking in radio

dramas film video games and expansive transmedia franchises Robert Yeates argues that post apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues Examining how the post apocalyptic American city has been repeatedly adapted and repurposed to new and developing media over the last century this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible Chapters present media specific analyses of these texts situating them within their historical contexts and the broader history of representations of urban ruins in American fiction Original in its scope and cross media approach American Cities in Post Apocalyptic Science Fiction both illuminates little studied texts and provides provocative new readings of familiar works such as Blade Runner and The Walking Dead placing them within the larger historical context of imaginings of the American city in ruins

The Urban Condition Brendan Gleeson, 2014-05-23 This book will speak to the new human epoch the Urban Age A majority of humanity now lives for the first time in cities The city the highest invention of the modern age is now the human heartland And yet the same process that brought us the city and its wonders modernisation has also thrown up challenges and threats especially climate change resource depletion social division and economic insecurity This book considers how these threats are encountered and countered in the urban age focusing on the issue of human knowledge and self awareness just as Hannah Arendt s influential *The Human Condition* did half a century ago *The Human Condition* is now *The Urban Condition* And it is this condition that will define human prospects in an age of default and risk Gleeson expertly explores the concept through three main themes The first is an exploration of what defines the current human condition especially the expanding cities that are at the heart of an over consumptive world economic order The second exposes and reviews the reawakening of forms of knowledge naturalism that are likely to worsen not improve our comprehension of the crisis The new science of urbanism in popular new literature exemplifies this dangerous trend The third and last part of the book considers prospects for a new urban and therefore human dispensation *The Good City* We must first journey in our urban vessels through troubled times But can we now start to plot the way to new shores to a safer more resilient city that provides for human flourishing *The Urban Condition* attempts this ideal conceiving a new urbanism based on the old idea of self limitation *The Urban Condition* is an original timely book that reconsiders and redeploys Arendt s famous notion of *The Human Condition* in an age of cities and risk It brings together several important strands of human consideration urbanisation climate threat resource depletion economic default and critical knowledge and weaves them into a new analysis of the times It also looks to a future that is nearly with us of changed climate resource scarcity and economic stress The book journeys into these troubled times proposing the idea of Lifeboat Cities as a way of thinking about the human journey to come

Clash of Barbarisms Gilbert Achcar, 2015-12-03 This inquiry into the probable shape of things to come is sober uncompromising deeply informed and full of provocative insights and judicious analyses Noam Chomsky The most forceful most rigorous text that there is to read on this war *Le Monde Diplomatique* The volatile

Middle East is the site of vast resources profound passions frequent crises and long standing conflicts as well as a major source of international tensions and a key site of direct U S intervention Two of the most astute analysts of this part of the world are Noam Chomsky the preeminent critic of U S foreign policy and Gilbert Achcar a leading specialist of the Middle East who lived in that region for many years In their new book Chomsky and Achcar bring a keen understanding of the internal dynamics of the Middle East and of the role of the United States taking up all the key questions of interest to concerned citizens including such topics as terrorism fundamentalism conspiracies oil democracy self determination anti-Semitism and anti Arab racism as well as the war in Afghanistan the invasion and occupation of Iraq the Israeli Palestinian conflict and the sources of U S foreign policy This book provides the best readable introduction for all who wish to understand the complex issues related to the Middle East from a perspective dedicated to peace and justice *The Best Books: D, Society. E, Geography.* 1912 William Swan Sonnenschein,1910 **The Global Development Crisis** Benjamin Selwyn,2014-02-07 The central paradox of the contemporary world is the simultaneous presence of wealth on an unprecedented scale and mass poverty Liberal theory explains the relationship between capitalism and poverty as one based around the dichotomy of inclusion into capitalism vs exclusion from capitalism Within this discourse the global capitalist system is portrayed as a sphere of economic dynamism and as a source of developmental opportunities for less developed countries and their populations Development policy should therefore seek to integrate the poor into the global capitalist system The Global Development Crisis challenges this way of thinking Through an interrogation of some of the most important political economists of the last two centuries Friedrich List Karl Marx Leon Trotsky Joseph Schumpeter Alexander Gerschenkron Karl Polanyi and Amarta Sen Selwyn argues that class relations are the central cause of poverty and inequality within and between countries In contrast to much development thinking which portrays the poor as reliant upon benign assistance this book advocates the concept of labour centred development Here the poor are the global labouring classes and their own collective actions and struggles constitute the basis of an alternative form of non elitist bottom up human development **The Literary World** ,1889 *Contemporary British Fiction and the Cultural Politics of Disenfranchisement* A. Beaumont,2015-12-05 By examining the representation of urban space in contemporary British fiction this book argues that key to the political left s strategy was a model of action which folded politics into culture and elevated disenfranchisement to the status of a political principle **Cities and Immigration** Avner de Shalit,2018-11-30 All over the world immigration is one of the most urgent political issues creating tensions and unrest as well as questions of justice and fairness Academics as well as politicians have been relating to the question of how states should cope with immigrants but 96% of immigrants end up in cities and in Europe and the USA two thirds of the immigrants settle in seven or eight cities Indeed most of us encounter with immigrants as city zens in our everyday life rather than as citizens of states So how should cities integrate immigrants Should cities be allowed to design their autonomous integration policies Could they issue visas

and permits to immigrants Should immigrants be granted voting rights in local elections before naturalization And how do cities think about these issues What can we learn from cities which are thought to be successful in integrating and assimilating immigrants Is there a model of integration within the city which is best The book discusses these questions both empirically and normatively The book is based on hundreds of in depth discussions of these matters with city dwellers in San Francisco New York London Amsterdam Berlin Thessaloniki and Jerusalem It shifts the discourse on immigration from thinking like a state to thinking like a city **New York Star** ,1921
