Handbook of Computational Social Choice Felix Brandt, Vincent Conitzer, Ulle Endriss, Jérôme Lang, Ariel D. Procaccia, 2016-04-25 A comprehensive survey of computational aspects of collective decisions for graduate students researchers and professionals in computer science and economics

Handbook of Computational Social Choice Felix Brandt, Vincent Conitzer, Ulle Endriss, Jérôme Lang, Ariel D. Procaccia, 2016-04-25 The rapidly growing field of computational social choice at the intersection of computer science and economics deals with the computational aspects of collective decision making This handbook written by thirty six prominent members of the computational social choice community covers the field comprehensively Chapters devoted to each of the field s major themes offer detailed introductions Topics include voting theory such as the computational complexity of winner determination and manipulation in elections fair allocation such as algorithms for dividing divisible and indivisible goods coalition formation such as matching and hedonic games and many more Graduate students researchers and professionals in computer science economics mathematics political science and philosophy will benefit from this accessible and self contained book

Algorithmic Decision Theory Toby Walsh, 2015-08-27 This book constitutes the thoroughly refereed conference proceedings of the 4th International Conference on Algorithmic Decision Theory ADT 2015 held in September 2015 in Lexington USA The 32 full papers presented were carefully selected from 76 submissions The papers are organized in topical sections such as preferences manipulation learning and other issues utility and decision theory argumentation bribery and control social choice allocation and other problems doctoral consortium

Economics and Computation Jörg Rothe, 2024-06-28 This textbook connects three vibrant areas at the interface between economics and computer science algorithmic game theory computational social choice and fair division It thus offers an interdisciplinary treatment of collective decision making from an economic and computational perspective Part I introduces to algorithmic game theory focusing on both noncooperative and cooperative game theory Part II introduces to computational social choice focusing on both preference aggregation voting and judgment aggregation Part III introduces to fair division focusing on the division of both a single divisible resource cake cutting and multiple indivisible and unshareable resources multiagent resource allocation In all these parts much weight is given to the algorithmic and complexity theoretic aspects of problems arising in these areas and the interconnections between the three parts are of central interest

The Future of Economic Design Jean-François Laslier, Hervé Moulin, M. Remzi Sanver, William S. Zwicker, 2019-11-15 This collection of essays represents responses by over eighty scholars to an unusual request give your high level assessment of the field of economic design as broadly construed Where do we come from Where do we go from here The book editors invited short informal reflections expressing deeply felt but hard to demonstrate opinions unsupported speculation and controversial views of a kind one might not normally risk submitting for review The contributors both senior researchers who have shaped the field and promising younger researchers responded with a diverse collection of provocative

pieces including retrospective assessments or surveys of the field opinion papers reflections on critical points for the development of the discipline proposals for the immediate future science fiction and many more The readers should have fun reading these unusual pieces as much as the contributors enjoyed writing them

Computing and Software Science

Bernhard Steffen, Gerhard Woeginger, 2019-10-04 The papers of this volume focus on the foundational aspects of computer science the thematic origin and stronghold of LNCS under the title Computing and Software Science State of the Art and Perspectives They are organized in two parts The first part Computation and Complexity presents a collection of expository papers on fashionable themes in algorithmics optimization and complexity The second part Methods Languages and Tools for Future System Development aims at sketching the methodological evolution that helps guaranteeing that future systems meet their increasingly critical requirements Chapter 3 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

ECAI 2023 K. Gal, A. Nowé, G.J. Nalepa, 2023-10-18 Artificial intelligence or AI now affects the day to day life of almost everyone on the planet and continues to be a perennial hot topic in the news This book presents the proceedings of ECAI 2023 the 26th European Conference on Artificial Intelligence and of PAIS 2023 the 12th Conference on Prestigious Applications of Intelligent Systems held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Krak w Poland Since 1974 ECAI has been the premier venue for presenting AI research in Europe and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI and to demonstrate innovative applications and uses of advanced AI technology ECAI 2023 received 1896 submissions a record number of which 1691 were retained for review ultimately resulting in an acceptance rate of 23% The 390 papers included here cover topics including machine learning natural language processing multi agent systems and vision and knowledge representation and reasoning PAIS 2023 received 17 submissions of which 10 were accepted after a rigorous review process Those 10 papers cover topics ranging from fostering better working environments behavior modeling and citizen science to large language models and neuro symbolic applications and are also included here Presenting a comprehensive overview of current research and developments in AI the book will be of interest to all those working in the field

ECAI 2016 G.A. Kaminka, M. Fox, P. Bouquet, 2016-08-24 Artificial Intelligence continues to be one of the most exciting and fast developing fields of computer science This book presents the 177 long papers and 123 short papers accepted for ECAI 2016 the latest edition of the biennial European Conference on Artificial Intelligence Europe's premier venue for presenting scientific results in AI The conference was held in The Hague the Netherlands from August 29 to September 2 2016 ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems PAIS 2016 and the Starting AI Researcher Symposium STAIRS The papers from PAIS are included in this volume the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications FAIA series Organized by the European Association for Artificial Intelligence EurAI and the Benelux Association for Artificial Intelligence BNVKI the

ECAI conference provides an opportunity for researchers to present and hear about the very best research in contemporary AI. This proceedings will be of interest to all those seeking an overview of the very latest innovations and developments in this field.

Multi-Winner Voting with Approval Preferences Martin Lackner, Piotr Skowron, 2022-11-17 From fundamental concepts and results to recent advances in computational social choice this open access book provides a thorough and in depth look at multi winner voting based on approval preferences. The main focus is on axiomatic analysis, algorithmic results and several applications that are relevant in artificial intelligence, computer science and elections of any kind. What is the best way to select a set of candidates for a shortlist for an executive committee or for product recommendations? Multi winner voting is the process of selecting a fixed size set of candidates based on the preferences expressed by the voters. A wide variety of decision processes in settings ranging from politics, parliamentary elections to the design of modern computer applications, collaborative filtering, dynamic Q&A platforms, diversity in search results etc. share the problem of identifying a representative subset of alternatives. The study of multi winner voting provides the principled analysis of this task. Approval based committee voting rules in short ABC rules are multi winner voting rules particularly suitable for practical use. Their usability is founded on the straightforward form in which the voters can express preferences: voters simply have to differentiate between approved and disapproved candidates. Proposals for ABC rules are numerous, some dating back to the late 19th century while others have been introduced only very recently. This book explains and discusses these rules, highlighting their individual strengths and weaknesses. With the help of this book the reader will be able to choose a suitable ABC voting rule in a principled fashion, participate in and be up to date with the ongoing research on this topic.

Enterprise Design, Operations, and Computing. EDOC 2024 Workshops Monika Kaczmarek-Heß, Kristina Rosenthal, Marek Suchánek, Miguel Mira Da Silva, Henderik A. Proper, Marianne Schnellmann, 2025-02-08 This volume constitutes revised selected papers of two workshops: the Doctoral Consortium, the Joint CBI EDOC Forum and another Joint CBI EDOC event which were held in conjunction with the 28th International Conference on Enterprise Design, Operations and Computing EDOC 2024 in Vienna, Austria, in September 10-13, 2024. The presented revised full papers in this book were carefully reviewed and selected. They stem from the following satellite events: iRESEARCH 2nd International Workshop on Empirical Methodologies for Research in Enterprise Architecture and Service oriented Computing, MIDas4CS 2nd Workshop on the Modelling and Implementation of Digital Twins for Complex Systems, Joint CBI EDOC Forum, Joint CBI EDOC Case Reports Track, Joint CBI EDOC Tools Demos Track, EDOC Doctoral Consortium, CBI Mini Dagstuhl Seminars.

Logic and Argumentation Mehdi Dastani, Huimin Dong, Leon van der Torre, 2020-03-27 This book constitutes the refereed proceedings of the Third International Conference on Logic and Argumentation CLAR 2020 held in Hangzhou, China, in April 2020. The 14 full and 7 short papers presented were carefully reviewed and selected from 31 submissions. The papers cover the focus of the CLAR series, including formal models of argumentation logics for decision making and uncertain reasoning, formal models

of evidence con rmation and justi cation logics for group cognition and social network reasoning about norms formal representationsof natural language and legal texts as well as applications of argumentationon climate engineering

Digital Transformation of Identity in the Age of Artificial Intelligence Kazuhiko Shibuya, 2020-02-19 This book examines the digital transformation of identity in the age of artificial intelligence It articulates the nature of identity of human beings based on cutting edge knowledge in the field of AI and big data sciences and discusses identity by drawing on comprehensive investigations in digital social sciences and exploring wider disciplines related to philosophy ethics sociology STS computer sciences engineering and medical sciences Reviewing contemporary conditions proliferated by advanced technological trends and unveiling social mechanisms of human identity this book appeals to undergraduate and graduate students as well as academic researchers

Conflict and Multimodal Communication Francesca D'Errico, Isabella Poggi, Alessandro Vinciarelli, Laura Vincze, 2015-03-17 This book explores the use of technology to detect predict and understand social cues in order to analyze and prevent conflict Traditional human sciences approaches are enriched with the latest developments in Social Signal Processing aimed at an automatic understanding of conflict and negotiation Communication both verbal and non verbal within the context of a conflict is studied with the aim of promoting the use of intelligent machines that automatically measure and understand the escalation of conflict and are able to manage it in order to support the negotiation process Particular attention is paid to the integration of human sciences findings with computational approaches from the application of correct methodologies for the collection of valid data to the development of computational approaches inspired by research on verbal and multimodal communication In the words of the trade unionist Pierre Carniti We should reevaluate conflict since without conflict there is no social justice With this in mind this volume does not approach conflict simply as an obstacle to be overcome but as a concept to be fully analyzed The philosophical linguistic and psychological aspects of conflict once understood can be used to promote conflict management as a means for change and social justice

The Rise of Artificial Intelligence and Big Data in Pandemic Society Kazuhiko Shibuya, 2022-03-28 This book presents a study of the COVID 19 pandemic using computational social scientific analysis that draws from and employs statistics and simulations Combining approaches in crisis management risk assessment and mathematical modelling the work also draws from the philosophy of sacrifice and futurology It makes an original contribution to the important issue of the stability of society by highlighting two significant factors the COVID 19 crisis as a catalyst for change and the rise of AI and Big Data in managing society It also emphasizes the nature and importance of sacrifices and the role of politics in the distribution of sacrifices The book considers the treatment of AI and Big Data and their use to both good and bad ends exposing the inevitability of these tools being used Relevant to both policymakers and social scientists interested in the influence of AI and Big Data on the structure of society the book re evaluates the ways we think of lifestyles economic systems and the balance of power in tandem with digital transformation

Interactive Granular Computations in

Networks and Systems Engineering: A Practical Perspective Andrzej Jankowski, 2017-06-25 The book outlines selected projects conducted under the supervision of the author Moreover it discusses significant relations between Interactive Granular Computing IGrC and numerous dynamically developing scientific domains worldwide along with features characteristic of the author's approach to IGrC The results presented are a continuation and elaboration of various aspects of Wisdom Technology initiated and developed in cooperation with Professor Andrzej Skowron Based on the empirical findings from these projects the author explores the following areas a understanding the causes of the theory and practice gap problem TPGP in complex systems engineering CSE b generalizing computing models of complex adaptive systems CAS in particular natural computing models by constructing an interactive granular computing IGrC model of networks of interrelated interacting complex granules c granules belonging to a single agent and or to a group of agents c developing methodologies based on the IGrC model to minimize the negative consequences of the TPGP The book introduces approaches to the above issues using the proposed IGrC model In particular the IGrC model refers to the key mechanisms used to control the processes related to the implementation of CSE projects One of the main aims was to develop a mechanism of IGrC control over computations that model a project's implementation processes to maximize the chances of its success while at the same time minimizing the emerging risks In this regard the IGrC control is usually performed by means of properly selected and enforced among project participants project principles These principles constitute examples of c granules expressed by complex vague concepts represented by c granules too The c granules evolve with time in particular the meaning of the concepts is also subject of change This methodology is illustrated using project principles applied by the author during the implementation of the POLTAX AlgoTradix Merix and Excavio projects outlined in the book Choice Richard K. Online Book Handbook Computational Social Choice Brandt Introduction

In the digital age, access to information has become easier than ever before. The ability to download Online Book Handbook Computational Social Choice Brandt has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Online Book Handbook Computational Social Choice Brandt has opened up a world of possibilities. Downloading Online Book Handbook Computational Social Choice Brandt provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Online Book Handbook Computational Social Choice Brandt has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Online Book Handbook Computational Social Choice Brandt. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Online Book Handbook Computational Social Choice Brandt. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Online Book Handbook Computational Social Choice Brandt, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Online Book Handbook Computational Social Choice Brandt has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous

learning and intellectual growth.
