**Focus on Health Loose Leaf Edition** Dale Hahn, Wayne Payne, Ellen Lucas, 2012-01-11      **Focus on Health Loose Leaf Edition** Ellen B. Lucas, Dr., Wayne A. Payne, Dale B. Hahn, Professor, 2012-01-11 Focus on Health offers an exciting and practical approach to the teaching of the traditional content areas of personal health. Its two key themes, the six dimensions of health and the five developmental tasks, help students apply the text's content to their own lives by improving their decision-making skills. The strength of the Focus on Health narrative includes its appeal to both traditional and non-traditional students, particularly the special attention it pays to students over age 25 who have returned to college. In addition, among its many health assessment activities, Focus on Health includes one of the most comprehensive health assessments found in any personal health textbook, a great tool for establishing a health baseline for students. The companion Online Learning Center website offers a wealth of pedagogical and assessment features, including quizzes, Internet activities, downloadable MP3s, and more.      **Focus on Health** Wayne A. Lucas, Ellen B. Lucas, Dale B. Hahn, 2013      **Health Services Management: A Case Study Approach, Eleventh Edition** Ann Scheck McAlearney, Anthony R. Kovner, 2017-09-01 Instructor Resources Instructor's Manual Today's healthcare managers face increasingly complex challenges and often must make decisions quickly. When a difficult situation arises, managers can no longer simply look it up online or in the management literature. Properly looking it up involves knowing where and how to look appropriately, framing a research question, weighing valid evidence, and understanding what is required to make proposed solutions work. Health Services Management: A Case Study Approach offers a diverse collection of case studies to help readers learn and apply key concepts of management with an emphasis on the use of evidence in management practice. The case study authors, many of whom are practitioners or academics who work closely with practitioners, present realistic management challenges across a variety of settings. They examine potential responses to those challenges by health services managers and other stakeholders and they provide a platform for meaningful discussion of opportunities and constraints for management decision makers attempting to implement change. This edition includes 60 case studies, 32 of which are brand new, arranged thematically into six sections: The Role of the Manager, Control, Organizational Design, Professional Integration, Adaptation, and Accountability. The new cases include the following: Better Metrics for Financial Management, What Makes a Patient-Centered Medical Home, Doing the Right Thing When the Financials Do Not Support Palliative Care, Hearing the Patient Voice, Working with Patient and Family Advisers to Improve the Patient Experience, Managed Care: Cautionary Tale, A Case Study in Risk Adjustment, and Patient Dumping. Learning by example is one of the oldest forms of learning, and the case study approach offers a time-tested way for students and healthcare professionals to develop practical skills that are not easily acquired through lectures. Health Services Management has been used in classrooms since 1978, and this eleventh edition offers a fresh take on a classic text.      **Jonas and Kovner's Health Care Delivery in the United States, 11th Edition** James R. **Rethinking Secondary Mental Healthcare** Robert Griffiths, Vyv Huddy, Stuart Eaton, Jasmine Waldorf, Warren Mansell, 2023-11-09 This book considers how principles derived from a theory of human behaviour, Perceptual Control Theory, can be applied to create mental health services that are more effective, efficient, and humane. Authored by clinicians, academics, and experts by experience, the text explores the way Perceptual Control Theory (PCT) principles can be applied within the secondary mental healthcare system, from the overall commissioning and design of services to the practice of individual clinicians. A range of topics relevant to the delivery of secondary mental healthcare are covered, including community and inpatient working, the delivery of individual psychological therapy, the use of restrictive practices, and working with relatives and carers. The book concludes by describing PCT's unique contribution to the field of mental healthcare. The book, one of the first of its kind, will be of interest to students and practitioners from a range of health and social care backgrounds, as well as service managers, commissioners, academics, and policy makers.
