**Okoboji Wetlands** Michael J. Lannoo, 1996-05-01 Lake Okoboji in northwest Iowa is the jewel of the Iowa Great Lakes A region of wetlands formed by prairie potholes the area is rich with lakes sloughs fens creeks prairies and kettleholes In this readable and beautifully illustrated volume Michael Lannoo presents an extensive natural history of Okoboji and its cherished wetlands that examines that world of our grandparents compares it to today s world and extrapolates to the world of our grandchildren *The Iowa Breeding Bird Atlas* Laura Spess Jackson, Carol A. Thompson, James J. Dinsmore, 1996 The Iowa Breeding Bird Atlas the first comprehensive statewide survey of Iowa s breeding birds provides a detailed record of the composition and distribution of the avifauna of the Hawkeye State The atlas documents the presence of 199 species 158 of which were confirmed breeding This landmark volume will alert Iowans to the limited distribution of numerous species and serve as a guide to the management practices such as forest and wetland management set aside programs reduction in farm chemical use and crop diversity which could help insure that many future changes are positive ones The Iowa Breeding Bird Atlas provides a welcome and much needed baseline for future comparisons of changes in Iowa s birdlife and by extension the lives of all animals in the state **Gardening in Iowa and Surrounding Areas** Veronica Lorson Fowler, Federated Garden Clubs of Iowa, 1997 On the East Coast so the story goes newcomers are asked where they come from on the West Coast they are asked what they do for a living in Iowa people ask them How s your garden doing Maybe this is not a true story but it does epitomize the importance of gardening for Iowans blessed as they are with the rich glacial soil so hospitable to corn and soybeans Rural and urban Iowans alike start planning next summer s garden in midwinter when their plots are still snow covered and deep frozen by state fair time their trees shrubs vegetables including the ubiquitous zucchini and flowers are thriving Veronica Fowler s month by month guide to gardening in Iowa is a concise valuable resource for all novice and experienced gardeners Beginning in January Fowler presents a monthly checklist to allow gardeners to prioritize seasonal tasks Her winter chapters focus on garden design cold weather gardening and starting plants from seeds in spring she moves into soil preparation shopping for plants wildflower and rose cultivation and lawn care basics summer brings landscaping flowers for cutting and organic gardening and fall involves cold frames winter harvest vegetables forcing bulbs and perennials trees and shrubs and ground covers and vines best suited for Iowa s climate as well as information on mail order suppliers gardens to visit where to go for help and garden club memberships Tips from some of the more than two thousand members of the Federated Garden Clubs of Iowa round out this plentiful harvest of useful advice On a day in February when the wind chill is well chilling and the forecast calls for more of the same the arrival of the first garden catalog of the season brings warmth to any gardener Veronica Fowler s accessible information packed book will become part of every gardener s life both indoors and out *The Iowa Lakeside Laboratory* Michael J. Lannoo, 2012-11-15 Imagine a place dedicated to the long term study of nature in nature a permanent biological field station a teaching and research laboratory

that promotes complete immersion in the natural world Lakeside Laboratory founded on the shore of Lake Okoboji in northwestern Iowa in 1909 is just such a place In this remarkable and insightful book Michael Lannoo sets the story of Lakeside Lab within the larger story of the primacy of fieldwork the emergence of conservation biology and the ability of field stations to address such growing problems as pollution disease habitat loss invasive species and climate change At the intersection of major ecosystems with distinct plant and animal communities and surrounded by what ironically may be the most intensely cultivated landscape on earth Lakeside has a long history of rubber boot biologists saturated in the spirit that grounds the new discipline of conservation biology and Lannoo brings this history to life with his descriptions of the people and ideas that shaped it Lakeside's continuing commitment to bringing the laboratory to the field rather than bringing the field to the lab has supported a focus on mammalogy ornithology herpetology ichthyology invertebrate biology parasitology limnology and algology subjects rarely taught now on university campuses but crucial to the planet's health Today's huge array of environmental problems can best be solved by people who have learned about nature within nature at a place with a long history of research and observation people who thoroughly understand and appreciate nature's cogs and wheels Lakeside Lab and biological research stations like it have never been more relevant to science and to society at large than they are today Michael Lannoo convinces us that while Lakeside's past is commendable its future grounded in ecological principles will help shape a more sustainable society
