Frisians and Their North Sea Neighbours John Hines, Nelleke IJssennagger, 2017 La 4e de couv indique As early as the 1st century AD learned Romans knew of more than one group of people living in north western Europe beyond their Empire's Gallic provinces whose names contained the element that gives us modern Frisian Those apparently were Celtic speaking peoples but that population seems to have completely replaced in the course of the convulsions that Europe underwent at the transition from the Ancient world to the Early Medieval in the 4th and 5th centuries The importance of linguistically Germanic Frisians as neighbours of the Anglo Saxons Franks Saxons and Danes in the centuries immediately following the fall of the Roman Empire in the West is widely recognized and yet these folk themselves remain enigmatic and the details of their culture and organization unfamiliar to many The Frisian population and their lands are the focal point of this volume although as is shown we often have to approach and to understand these people through comparison with or even through the eyes of their neighbours Empirically this perspective embraces all of the coastal communities of the North Sea region and their connexions with the Baltic shores Twelve separate but complementary papers present the most up to date discoveries research and interpretations following the story of the various Frisians through from the Roman Period to the next great period of disruption and change introduced by the Viking Scandinavians Methodologically the thorough combination and

integration of linguistic textual and archaeological evidence offers a new multidisciplinary template and sets new standards for Early Medieval studies *Runes Across the North Sea from the Migration Period and Beyond* Livia Kaiser, 2021-09-20

The scattered research history of the Old Frisian runic inscriptions dating to the early Medieval period ca AD 400 1000 calls for a comprehensive and systematic reprocessing of these objects within their socio cultural context and against the backdrop of the Old English Runic tradition This book presents an annotated edition of 24 inscriptions found in the modern day Netherlands England and Germany It provides the reader with an introduction to runological methodology a linguistic commentary on the features attested in the inscriptions and a detailed catalogue which outlines the find history of each object and summarizes previous and new interpretations supplemented by pictures and drawings This book additionally explores the question of Frisian identity and an independent Frisian runic writing tradition and its relation to the contemporary Anglo Saxon runic culture In its entirety this work provides a rich basis for future research in the field of runic writing around the North Sea and may therefore be of interest to scholars of historical linguistics and early Medieval history and archaeology *Reshaping of the Nominal Inflection in Early Northern West Germanic* Elżbieta Adamczyk, 2018-04-20

The book is a comprehensive corpus study of analogical developments in the nominal morphology of four Northern West Germanic languages Old English Old Frisian Old Saxon and Old Low Franconian It examines the patterns of reorganisation of the nominal paradigms focusing on the analogical interdeclensional shifts of nouns affiliated with historical minor classes The wide scope and comparative nature of the study facilitate identifying the major patterns of inflectional restructuring both language specific and those of a more general character demonstrating that the process was far from random By framing the investigated phenomena quantitatively the study affords insight into the dynamics of the changes their scope in individual languages the mechanisms underlying the restructuring process and the factors conditioning it The book may be of interest to both historical linguists who may appreciate its descriptive aspects as well as morphologists concerned with the mechanisms of morphological processes especially analogy
