Filipek,1999 Living with Earth Travis Hudson,2016-09-17 For many students with no science background environmental geology may be one of the only science courses they ever take Living With Earth An Introduction to Environmental Geology is ideal for those students fostering a better understanding of how they interact with Earth and how their actions can affect Earth s environmental health The informal reader friendly presentation is organized around a few unifying perspectives how the various Earth systems interact with one another how Earth affects people creating hazards but also providing essential resources and how people affect Earth Greater emphasis is placed on environment and sustainability than on geology unlike other texts on the subject Essential scientific foundations are presented but the ultimate goal is to connect students proactively to their role as stakeholders in Earth s future
