Metaphysics Theodor W. Adorno, Rolf Tiedemann, 2002-10-01 This volume makes available in English for the first time the famed lectures on metaphysics by one of the founders of the Frankfurt School of Critical Theory and one of the most influential thinkers of the 20th century It provides a unique introduction not only to metaphysics but also to Adorno s own The Thought of Matter Richard A. Lee Jr., 2015-12-18 Discussions of materialism have exploded intellectual standpoint in recent years From the speculative realism materialism of Quentin Meillassoux to the New Materialism of many modern Marxisms the interest in a return to or rehabilitation of materialism is on the rise What is not analyzed in many of these discussions however is a trenchant methodological and metaphysical problem lying at the basis of any philosophical materialism if matter is simply that which is other than thought then how can it be thought without drawing it away from its materiality On the other hand if one assumes a direct access to matter to this other what are the conditions of that access Are they material conditions or cognitive thought conditions Does what would present itself immediately present at the same time the conditions that allow it to be presented If not then we are closer to a theology of matter and further from a philosophical materialism The Thought of Matter investigates this metaphysical and methodological problem through Aristotle Marx Adorno Althusser Duns Scotus Hobbes and Benjamin in order to show that a philosophical materialism necessarily requires the concepts and tools of thought in order to allow the otherness of matter to emerge in its own The Problem of Metaphysics and the Meaning of Metaphysical Explanation Hartley Burr Alexander, Percy materiality Hughes, William Hallock Johnson, 1902 **Negativity and Revolution** John Holloway, Fernando Matamoros, Sergio Tischler, 2008-11-20 How can activists combat the political paralysis that characterises the anti-dialectical Marxism of Foucault Derrida and Deleuze without reverting to a dogmatic orthodoxy This book explores solutions in the negative dialectics of Theodor Adorno The poststructuralist shift from dialectics to difference has been so popular that it becomes difficult to create meaningful revolutionary responses to neoliberalism The contributors to this volume come from within the anti capitalist movement and close to the concerns expressed in Negri and Hardt's Empire and Multitude However they argue forcefully and persuasively for a return to dialectics so a real world radical challenge to the current order can be constructed This is a passionate call to arms for the anti capitalist movement It should be read by all engaged activists and students of political and critical theory A Critical Theory of Global Justice Malte Frøslee Ibsen, 2022-12-20 This book offers the first systematic treatment of the idea of a critical theory of world society Malte Fr slee Ibsen develops a reconstruction of the Frankfurt School tradition as four paradigms of critical theory in original interpretations of the work of notable theorists Concepts, Theories, and the Mind-Body Problem Herbert Feigl, Michael Scriven, Grover Maxwell,1958 Concepts Theories and the Mind Body Problem was first published in 1958 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original

University of Minnesota Press editions This is Volume II of the Minnesota Studies in the Philosophy of Science a series published in cooperation with the Minnesota Center for Philosophy of Science at the University of Minnesota The series editors are Herbert Feigl and Grover Maxwell who are also co editors with Michael Scriven of this volume The ten papers by eleven authors which make up the content of this volume are the result of collaborative research of the Center in philosophical and methodological problems of science in general and psychology in particular The contributors are Paul Oppenheim Hilary Putnam Carl G Hempel Michael Scriven Arthur Pap Wilfrid Sellars H Gavin Alexander P F Strawson Karl Zener Herbert Feigl and Paul E Meehl In addition an extensive discussion of Internationality and the Mental by Wilfrid Sellars and Roderick Chisholm is presented in an appendix In a review of this volume the journal Psychiatric Quarterly commented These essays will not prove easy for the layman to read but he can hardly fail to find his effort rewarded if he is persistent For the professional behavioral scientist increased awareness and caution in his use of scientific language and thinking about scientific theory should result One of the papers in this volume The Mental and the Physical by Herbert Feigl has been published by the University of Minnesota Press with further discussion by Dr Feigl as a separate book The Mental Adorno's Poetics of Critique Steven Helmling, 2011-10-20 Adorno s Poetics of and the Physical The Essay and a Postscript Critique is a critical study of the Marxist culture critic Theodor W Adorno a founding member of the Frankfurt school and widely regarded today as its most brilliant exponent Steven Helmling is centrally concerned with Adorno s notoriously difficult writing a feature most commentators acknowledge only to set it aside on the way to an expository account of what Adorno is saying By contrast Adorno s complex writing is the central focus of this study which includes detailed analysis of Adorno s most complex texts in particular his most famous and complicated work co authored with Max Horkheimer Dialectic of Enlightenment Helmling argues that Adorno s key motifs dialectic concept negation immanent critique constellation are prescriptions not merely for critical thinking but also for critical writing For Adorno the efficacy of critique is conditioned on how the writing of critique is written Both in theory and in practice Adorno urges a poetics of critique that is every bit as critical as anything else in his critical theory Ontology and Dialectics Theodor W. Adorno, 2018-12-21 Adorno s lectures on ontology and dialectics from 1960 61 comprise his most sustained and systematic analysis of Heidegger's philosophy They also represent a continuation of a project that he shared with Walter Benjamin to demolish Heidegger Following the publication of the latter's magnum opus Being and Time and long before his notorious endorsement of Nazism at Freiburg University both Adorno and Benjamin had already rejected Heidegger's fundamental ontology After his return to Germany from his exile in the United States Adorno became Heidegger's principal intellectual adversary engaging more intensively with his work than with that of any other contemporary philosopher Adorno regarded Heidegger as an extremely limited thinker and for that reason all the more dangerous In these lectures he highlights Heidegger's increasing fixation with the concept of ontology to show that the doctrine of being can only truly be understood through a process of dialectical thinking

Rather than exploiting overt political denunciation Adorno deftly highlights the connections between Heidegger's philosophy and his political views and in doing so offers an alternative plea for enlightenment and rationality These seminal lectures in which Adorno dissects the thought of one of the most influential twentieth century philosophers will appeal to students and scholars in philosophy and critical theory and throughout the humanities and social sciences **Psychedelic Humanities** Erika Dyck, Tehseen Noorani, Nicolas Langlitz, Alex Dymock, Anne Katrin Schlag, Oliver Davis, 2024-06-19 Psychedelics are part of a resurgence of interest in consciousness studies especially as altered states of consciousness are being re examined in the context of psychedelic assisted therapies To date discussions about psychedelics in modern medicine have been dominated by studies in biomedicine However given that cultural factors play a significant role in the subjective effects of psychedelics psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences **Historicism and Its Problems** Ernst Troeltsch, 2024 In this volume Ernst Troeltsch embraces historical relativity while rejecting historical relativism and thereby provides a model for the philosophy of history The volume remains as relevant as it was in 1923 **Problems in Philosophy of Education** James Scott Johnston, 2019-02-07 Problems in Philosophy of Education canvasses several of the leading issues in philosophy of education These include the disconnect between the disciplines of philosophy and philosophy of education the strained relationship between educational practice and philosophy of education the role of educational research in philosophy of education and the lack of an independent scholarship for philosophy of education James Scott Johnson argues for a philosophy of education separate and distinct from both the disciplines of philosophy and education and claims that philosophy of education should raise and address its own questions and concerns Supporting this is a model of how philosophy of education should originate basic questions together with a set of philosophic presuppositions regarding the model s logic ethics politics and relationship to science and social science The Politics of Immortality in Rosenzweig, **Barth and Goldberg** Mårten Björk,2022-04-21 Highlighting the central importance of theological configurations of immortality and eternal life from 1914 1945 M rten Bj rk explores the key writings of Franz Rosenzweig Karl Barth and Oskar Goldberg to situate their ideas in relation to the political turmoil of the period including the rise of social Darwinism nationalism and fascism The conversations happening among Christian and Jewish theologians and philosophers on the nature of immortality and eternal life during the period constitute what Bj rk calls a politics of immortality The speculative

question of eternal life became a way to address the meaning of a good life in a period when millions of lives were lost to war camps and prisons This book shows how theology was related to central political concepts and ideas of the era revealing how the question of immortality pursued by Rosenzweig Barth and Goldberg became a way to resist the reduction of life to race blood and soil By situating the exact political consequences of theological and metaphysical theories of immortality and eternal life Bj rk s discussion of Rosenzweig Barth and Goldberg confronts the perennial question on the relation between life and death and exposes the important connections between political theology and philosophical posthumanism Theodor W. Adorno's Philosophy, Society, and Aesthetics Stefano Petrucciani, 2021-04-22 This book is a complete presentation of the most important themes of Theodor W Adorno's critical theory and of its relevance for the understanding of the modern society After an Introduction which traces Adorno's biographical and intellectual profile the book is structured in three parts The first is devoted to theoretical philosophy and in particular to the concepts of philosophy negative dialectics and metaphysics and his aim is to clarify the Adornian understanding of such difficult concepts The second is devoted to the main themes of Adorno's social theory the concept of domination the relationship with Marxism the theory of the decay of the individual the critique of mass manipulation The third part is devoted to aesthetics and culture criticism and entails a conclusion in which the author outlines a confrontation between the Adornian and the Habermasian critique of modernity

Political Theologies Hent de Vries, Lawrence Eugene Sullivan, 2006 What has happened to religion in its present manifestations Containing contributions from distinguished scholars from disciplines such as philosophy political theory anthropology classics and religious studies this book seeks to address this guestion Minimal Theologies Hent de Vries, 2005-02-25 Publisher Description The Problem of Objectivity in Gadamer's Hermeneutics in Light of McDowell's Empiricism Morten S. Thaning, 2015-08-21 This book reassesses Gadamer's hermeneutics by bringing it into a dialogue with John McDowell's minimal empiricism It employs the resources of McDowell's minimal empiricism to address the transcendental and ontological presuppositions for objective experience and understanding while retaining Gadamer's emphasis on the historicity of understanding By means of the dialogue with McDowell the book develops a hermeneutical conception of objectivity and perceptual experience which also entails reinterpretations of Gadamer's notions of tradition practical wisdom and meaning The book explores the philosophical space beyond the analytic Continental divide and demonstrates that hermeneutics is not limited to a reflection on understanding as it is practiced in the human sciences but can be revived as a distinct and cogent philosophical approach with a transcendental and ontological dimension Thaning s book is a richly detailed well argued and coherent presentation of a defensible and potentially very important philosophical position It demonstrates an impressively deep understanding of the literature both from the phenomenological tradition and from the part of the analytical tradition inspired by Wilfred Sellars to which John McDowell belongs Being a substantial philosophical achievement in its own right the book raises far reaching questions that will be of interest to a wide audience

Dr Steven Crowell Rice University Houston USA Morten Thaning's book is an important contribution to the discourse of philosophical hermeneutics Thaning extensively discusses a topic which recent debates have touched upon but which up to now has not been the subject matter of concentrated scholarly work the relation between Gadamer's hermeneutics and McDowell's empiricism With Thaning's interpretation Gadamer work can be read anew as concerning the problem of hermeneutical objectivity Prof Dr G nter Figal University of Freiburg Germany The Schopenhauerian Mind David Bather Woods, Timothy Stoll, 2023-11-14 Arthur Schopenhauer 1788 1860 is now recognised as a figure of canonical importance to the history of philosophy Schopenhauer founded his system on a highly original interpretation of Kant s philosophy developing an entirely novel and controversial worldview guided centrally by his striking conception of the human will and of art and beauty His influence extends to figures as diverse as Fredrich Nietzsche Ludwig Wittgenstein and Iris Murdoch within philosophy and Richard Wagner Thomas Hardy Sigmund Freud Thomas Mann Samuel Beckett and Jorge Luis Borges outside it The Schopenhauerian Mind is an outstanding wide ranging collection that explores the rich nature of Schopenhauer's ideas texts influences and legacy Comprising 38 original chapters by an international team of contributors the volume is organised into five clear parts Knowledge and Reality Aesthetics and the Arts Ethics Politics and Salvation Before Schopenhauer After Schopenhauer The Schopenhauerian Mind covers all the key areas and concepts of Schopenhauer's philosophy including fields omitted in previous studies It is essential reading for students of nineteenth century philosophy Continental philosophy and philosophy of art and aesthetics and also of interest to those in related disciplines such as literature and religion The Honor of Thinking Rodolphe Gasché, 2007 The Honor of Thinking evaluates the concepts and discourses of critique theory and philosophy in light of the exigencies of what Martin Heidegger and the French post Heideggerian thinkers have established about the nature and the tasks of thinking **Beckett Re-Membered** James Carney, Michael O'Sullivan, Karl White, 2011-11-15 Beckett Re Membered showcases some of the most recent scholarship on the Irish novelist poet and playwright Samuel Beckett As well as essays on Beckett s literary output it contains a section on the philosophical dimension of his work an important addition given the profound impact Beckett has had on European philosophy Rather than attempting to circumscribe Beckett scholarship by advocating a theoretical position or thematic focus Beckett Re Membered reflects the exciting and diverse range of critical interventions that Beckett studies continues to generate In the nineteen essays that comprise this volume every major articulation of Beckett's work is addressed with the result that it offers an unusually comprehensive survey of its target author Beckett Re Membered will appeal to any reader who is interested in provocative responses to one of the twentieth century s most important European writers Adorno and Philosophical Modernism Roger S. Foster, 2016-08-29 Adorno and Philosophical Modernism The Inside of Things offers an original interpretation and vigorous defense of Theodor Adorno s idea of philosophy as the practice of what Roger Foster calls philosophical modernism Adorno's philosophical writings from the early 1930s to the mature

works of the late 1960s are deeply informed by a distinctively modernist vision of human experience. This book seeks to establish that Adorno's unique and lasting contribution to philosophy consists in his sustained and rigorous development of this modernist vision into an encompassing practice of philosophical interpretation. The essential features of this vision can be discerned in all of Adorno's major writings in philosophy social theory and aesthetics. Its defining element is the idea of a pattern underlying ordinary experience which although not directly accessible can be disclosed by the reconstructive work of philosophical or literary language. This vision Foster argues can be discerned in the major works of literary modernism including Woolf Proust and Musil as well as in the interpretive technique of psychoanalysis developed by Sigmund Freud The importance of Adorno's contribution to twentieth century philosophy can only be fully appreciated by understanding how he developed this vision into an overarching practice of philosophical interpretation that furnished a coherent and profound response to the decay of experience afflicting late modern societies. In this book Foster expounds that interpretive practice exploring its ramifications and in particular its relation with literary modernism and places it in critical dialogue with alternative philosophical responses.
