Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport compact world. It's not uncommon to find one of these four cylinder iron block aluminum headed 2 liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning well above the 200-300 hp produced in the factory made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse and Galant and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport compact enthusiasts who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road Race Engineering in Santa Fe Springs, California. RRE is the most well known and respected Mitsubishi turbo performance shop in the United States and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. *How to Build Max Performance Mitsubishi 4G63t Engines* covers every system and component of the engine including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide and advice for

choosing engine components and other parts Profiles of successful built up engines show the reader examples of what works and the book includes helpful guidance for choosing your own engine building path
