

## Master Data

Employee master data can be accessed using KHRIS transaction PA20. Within PA20, master data is grouped by like information and stored in linked screens. These screens of grouped data are called **infotypes**. Individually, the infotypes contain related master data. Together, these records combine to make up the employee's personnel file. Just as a paper personnel file consists of various file tabs, the electronic file in PA20 utilizes infotypes to organize the employee's information.
