Pacaf Family Day 2014:

Air Force Magazine ,2017 Unmanned Combat Air Systems in Future Warfare C. Wills,2016-04-29 Control of the air is the foundation for all conventional military operations against an adversary with an air defence capability In future warfare will it be possible for Unmanned Combat Air Systems to undertake the tasks and accept most of the risks that until now have been the lot of military aviators **Air Force and Space Digest** ,2015-07 **Air Power in UN Operations** A. Walter Dorn,2016-03-23 Air power for warfighting is a story that s been told many times Air power for peacekeeping and UN enforcement is a story that desperately needs to be told For the first time this volume covers the fascinating range of aerial peace functions In rich detail it describes aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war affected populations aircraft serving as the eyes in sky to keep watch for the world organization and combat aircraft enforcing the peace Rich poignant case studies illuminate the past and present use of UN air power pointing the way for the future This book impressively fills the large gap in the current literature on peace operations on the United Nations and on air power generally *Conflict and Cooperation in the Indo-Pacific* Ash Rossiter,Brendon J. Cannon,2020-04-15 This book explores the most important strategic questions about the emerging Indo Pacific region by offering an incisive analysis on the current and future patterns of competition and cooperation of key nations in the region Examining emerging policies of cooperation and conflict adopted by Indo Pacific states in response to a rising China the book offers insights into the evolving Indo Pacific visions and strategies being developed in Japan India Australia and the US in reaction to shifting geopolitical realities The book provides evidence of geopolitical advances in what some see as a spatially coherent maritime zone stretching from the eastern Pacific to the western Indian Ocean including small island states and countries that line its littoral It also analyzes the development and operationalization of Indo Pacific policies and strategies of various key nations Contributors provide both macro and micro perspectives to this critically significant topic offering insights into the grand strategies of great powers as well as case studies ranging from the Philippines to the Maldives to Kenya The book suggests that new rivalries shifting alliances and economic ebbs and flows in the Indo Pacific will generate new geopolitical realities and shape much else beyond in the twenty first century A timely contribution to the rapidly expanding policy and scholarly discussions about what is likely to be the defining region for international politics for coming generations the book will be of interest to policymakers as well as students and academics in the fields of International Relations Foreign Policy Security Studies Diplomacy and International Law East and South Asian Studies East African Studies Middle East Studies and Australian Studies **Tiger Check** Steven A. Fino,2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots

vanquished their foes by focusing on a four inch square cockpit display manipulating electromagnetic waves and launching rocket propelled guided missiles from miles away In this new era of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino's *Tiger Check* offers a detailed study of air to air combat focusing on three of the US Air Force's most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography *Tiger Check* provides a richer perspective on humans and machines working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace

PLA Influence on China's National Security Policymaking Phillip C. Saunders, Andrew Scobell, 2015-09-09 In recent years there have been reports of actions purportedly taken by People's Liberation Army PLA units without civilian authorization and of Chinese Communist Party CCP civilian leaders seeking to curry favor with the military suggesting that a nationalistic and increasingly influential PLA is driving more assertive Chinese policies on a range of military and sovereignty issues To many experienced PLA watchers however the PLA remains a party army that is responsive to orders from the CCP *PLA Influence on China's National Security Policymaking* seeks to assess the real relationship between the PLA and its civilian masters by moving beyond media and pundit speculation to mount an in depth examination and explanation of the PLA's role in national security policymaking After examining the structural factors that shape PLA interactions with the Party State the book uses case studies to explore the PLA's role in foreign policy crises It then assesses the PLA's role in China's territorial disputes and in military interactions with civilian government and business exploring the military's role in China's civil military integration development strategy The evidence reveals that today's PLA does appear to have more influence on purely military issues than in the past but much less influence on political issues and to be more actively engaged in policy debates on mixed civil military issues where military equities are at stake

Hallion, 2018-02-22 Operation Rolling Thunder

was the campaign that was meant to keep South Vietnam secure and dissuade the North from arming and supplying the Viet Cong. It pitted the world's strongest air forces against the MiGs and missiles of a small Soviet client state. But the US airmen who flew Rolling Thunder missions were crippled by a badly thought out strategy, rampant political interference in operational matters, and aircraft optimised for Cold War nuclear strikes rather than conventional warfare. Ironically, Rolling Thunder was one of the most influential episodes of the Cold War, its failure spurring the 1970s US renaissance in professionalism, fighter design, and combat pilot training. Dr Richard P. Hallion, one of America's most eminent air power experts, explains how Rolling Thunder was conceived and fought, and why it became shorthand for how not to fight an air campaign.
