Padi Course Director Manual 2015:

Marine Tourism, Climate Change, and Resiliency in the Caribbean, Volume I Kreg Ettenger, Samantha Hogenson, 2017-05-23 As the nations of the Caribbean respond to and prepare for climate change tourism has the potential to both worsen and mitigate these effects In this book we look at marine tourism and its connection with ocean health fisheries and critical ecosystems including coral reefs We consider the role that marine protected areas can play in preserving reefs and other ecosystems leading to greater resilience in the face of climate change Finally we look at how the tourism industry is responding to the threat of climate change using its economic and social capital to foster positive change in the Caribbean and other parts of the world While the situation is clearly urgent we hope this volume provides readers with some optimism as well as tangible ideas for using tourism to help mitigate the impending effects of climate change on marine ecosystems and economies

Padi,2011-06-30 The PADI Rebreather Diver and Advanced Rebreather Diver courses consist of three divisions knowledge development practical applications and training dives Knowledge development develops much of the theory and background information for mastery This information includes rebreather theory setup maintenance equipment skills and emergency procedures The PADI Rebreather Diver Advanced Rebreather Diver Manual covers much of this information but the student will also use the rebreather manufacturer s literature extensively This is because rebreathers vary significantly so that different procedures apply to different models During the practical applications the student will put much of what was studied into practice under the guidance of the PADI Rebreather Instructor In these sessions the student practices rebreather setup pre-dive checks and dive planning Then during the training dives the rebreather diving skills will be performed with the PADI Rebreather Instructor
