Christopher J. Greig,2014-03-24 Ontario Boys explores the preoccupation with boyhood in Ontario during the immediate postwar period 1945 1960 It argues that a traditional version of boyhood was being rejuvenated in response to a population fraught with uncertainty and suffering from insecurity instability and gender anxiety brought on by depression era and wartime disruptions in marital familial and labour relations as well as mass migration rapid postwar economic changes the emergence of the Cold War and the looming threat of atomic annihilation In this sociopolitical and cultural context concerned adults began to cast the fate of the postwar world onto children in particular boys In the decade and a half immediately following World War II the version of boyhood that became the ideal was one that stressed selflessness togetherness honesty fearlessness frank determination and emotional toughness It was thought that investing boys with this version of masculinity was essential if they were to grow into the kind of citizens capable of governing protecting and defending the nation and of course maintaining and regulating the social order Drawing on a wide variety of sources Ontario Boys demonstrates that although girls were expected and encouraged to internalize a special kind of citizenship as caregivers and educators of children and nurturers of men the gendered content and language employed indicated that active public citizenship and democracy was intended for boys An appropriate boyhood in the postwar period became if nothing else a metaphor for the survival of the nation Encyclopedia of Theory & Practice in Psychotherapy & Counseling Jose A.
