Mirage Of Health Utopias Progress And Biological Change:

Mirage of Health René Dubos, 2018-12-02 Every man dreams of a utopia in which disease is conquered and the only thing left to die of is old age In a study of the history and concepts of medicine Ren Dubos who is one of America s most distinguished scientists shows that such a utopia is neither possible nor desirable Organized species such as ants have established a satisfactory equilibrium with their environment and suffer no great waves of disease or changes in their social structure But man is essentially dynamic his way of life constantly in flux from century to century He experiments with synthetic products and changes his diet he builds cities that breed rats and infection he builds automobiles and factories which pollute the air and he constructs radioactive bombs As life becomes more comfortable and technology more complicated new factors introduce new dangers the ingredients for utopia are the agents of new disease Dr Dubois thesis may sound discouraging to a world looking for a cure all in medical research but actually it is affirmative even hopeful Once we accept the fact that complete freedom from disease and from struggle is almost incompatible with the process of living we will know that our aspirations cannot be satisfied with health and the easy life The viewpoint expressed in *Mirage of Health* has now become a dominant one in our general culture and encompasses much of current concern with improving lifestyles related to health and promoting greater health consciousness among the public In this sense the discussion although written twenty five years ago is perhaps more relevant today than it was then DAVID MECHANIC University Professor Ren Dubos Professor of Behavioral Sciences and Director of the Institute for Health Health Care Policy and Aging Research Rutgers University *Mirage of Health* Dr. René Dubos, 1961 *Mirage of Health* René Jules Dubos, 1987 Cloth edition 25 00
