Bruley, 2012-12-06 Seventeen years after the 2nd International Symposium on Oxygen Transport to Tissue which was held in Mainz in March 1975 the local Organizing Committee and the Board of ISOTT were pleased to host the ISOTT Conference in Mainz on the Rhine again The venue of the 20th meeting was the prestigious fully restored Schloss Waldthausen Waldthausen Castle which provided a special setting for ISOTT 1992 The beautiful front view of the castle became part of the ISOTT 1992 logo The 20th ISOTT Meeting was held in Mainz from August 26th through August 30th 1992 The Conference attracted 200 active participants from 16 countries The theme of this meeting emphasized oxygen transport to tumors but as in earlier meetings essentially all aspects of oxygen transport within the body were covered as demonstrated by the manuscripts comprising this volume of the series Oxygen Transport to Tissue All manuscripts were reviewed Extensive revisions were made in about 25% and modest revision in about another 30% Because we had to compromise between the aim of rapid publication on the one hand and the need for thorough review on the other

minor errors in format and some typographical errors were not corrected Except for some revisions all of the original camera ready manuscripts in this volume were prepared by the authors themselves and we greatly appreciate their cooperation

The Mongolian Gerbil Brain Avraham Mayevsky, 2024-09-10 The Mongolian gerbil brain lies in the anatomy of the blood vessels supplying blood to the brain In all mammals there is a special mechanism that compensates for the decreased blood flow to the brain in the case of development of stroke This mechanism is missing in the gerbil and therefore makes the Mongolian gerbil a unique model for stroke Dr Mayevsky adopted the gerbil as a model for stroke and his laboratory uniquely studied the mitochondria in the gerbil brain under various pathophysiological conditions This book describes the history of the Mongolian gerbil in research the brain energy metabolism and mitochondrial function and brain real time monitoring systems used in gerbils as well as the brain vasculature of the Mongolian gerbil Further the book includes chapters on brain multisite recording under brain perturbations multiparametric responses to brain activation and the effect of neuroprotectants on the gerbil brain This is an ideal book for research teams researching stroke and epilepsy
