Oyo Town Kingship Lineage:

Nigerian Chiefs Olufemi Vaughan, 2006 An analysis of how traditional power structures in Nigeria have survived the forces of colonialism and the modernization processes of postcolonial regimes This book analyzes how indigenous political power structures in Nigeria survived both the constricting forces of colonialism and the modernization programs of postcolonial regimes With twenty detailed case studies on colonial and postcolonial Nigerian history the complex interactions between chieftaincy structures and the rapidly shifting sociopolitical and economic conditions of the twentieth century become evident Drawing on the interactions between the state and chieftaincy this study goes beyond earlier Africanist scholarship that attributes the resilience of these indigenous structures to their enduring normative and utilitarian qualities Linked to externally derived forces and legitimated by neotraditional themes chieftaincy structures were distorted by the indirect rule system transformed by competing communal claims and legitimated a dominant ethno regional power configuration Olufemi Vaughan is Professor in the Department of Africana Studies and the Department of History State University of New York at Stony Brook Winner of the 2001 Cecil B Currey Book length Award from the Association of Third World Studies

The African Revolution

Richard Reid, 2025-01-28 A panoramic global history of Africa in the age of imperialism Africa's long nineteenth century was a time of revolutionary ferment and cultural innovation for the continent's states societies and economies Yet the period preceding what became known as the Scramble for Africa by European powers in the decades leading up to World War I has long been neglected in favor of a Western narrative of colonial rule The African Revolution demonstrates that the Scramble and the resulting imperial order were as much the culmination of African revolutionary dynamics as they were of European expansionism In this monumental work of history Richard Reid paints a multifaceted portrait of a continent on the global stage He describes how Africa witnessed the emergence of new economic and political dynamics that were underpinned by forms of violence and volatility not unlike those emanating from Europe Reid uses a stretch of road in what is now Tanzania one of the nineteenth century's most vibrant commercial highways as an entry point into this revolutionary epoch weaving a broader story around characters and events on the road He integrates the African experience with new insights into the deeper currents in European societies before and after conquest and he shows how the Africans themselves created opportunities for European expansion Challenging the portrayal of Africa's transformative nineteenth century as a mere prelude to European colonialism The African Revolution reveals how this turbulent yet hugely creative era for Africans intersected with global intrusions to shape the modern age
