Pain Management in Nursing Practice Shelagh Wright, 2014-12-08 Pain is a challenging area to understand for any healthcare professional and quality training on the subject is required if nurses are to provide effective pain management and person-centred care. Based on the curriculum developed by the International Association for the Study of Pain, this book offers an essential guide to managing pain. Beginning with an examination of the biology of pain, it then goes on to consider pain management across the life course, looking at key topics including acute pain, cancer pain, and pharmacology. Case scenarios are included throughout the book to help readers apply the knowledge they have learned to their own practice. This book is aimed primarily at meeting the learning needs of undergraduate nurses and is essential reading for all healthcare professionals studying pain. The text will be helpful as a basic foundation for more advanced postgraduate courses in pain management in nursing practice.

Neuropathic Pain Cory Toth, Dwight E. Moulin, 2013-11-07 Central or peripheral neuropathic pain can be caused by a wide range of injuries, infections, and diseases such as spinal cord injury, multiple sclerosis, stroke, herpes zoster, diabetes, and cancer. Many of these pain syndromes are difficult to treat, representing a challenge for many neurologists not routinely trained in pain management. Written by an international team of experts in the field, *Neuropathic Pain: Causes, Management, and Understanding* gives readers an in-depth understanding of the multitude of conditions causing neuropathic pain. Epidemiology, clinical diagnosis, pathophysiology, outcome measurement, and the best evidence-based management of individual and general neuropathic pain conditions are also described in depth. A unique chapter written from a patient's viewpoint gives new insight into how chronic neuropathic pain affects the lives of those patients with the condition. This book is essential reading for all pain specialists, neurologists, psychiatrists, and anesthesiologists who wish to better understand their patients' neuropathic pain.
