**Painful Choices** David Welch, 2011 Under what conditions should we expect states to do things radically differently all of a sudden In this book David Welch seeks to answer this question constructing a theory of foreign policy change inspired by organization theory cognitive and motivational psychology and prospect theory He then test drives the theory in a series of comparative case studies in the security and trade domains Argentina s decision to go to war over the Falklands Malvinas vs Japan s endless patience with diplomacy in its conflict with Russia over the Northern Territories America s decision to commit large scale military force to Vietnam vs its ultimate decision to withdraw and Canada s two abortive flirtations with free trade with the United States in 1911 and 1948 vs its embrace of free trade in the late 1980s Painful Choices has three main objectives to determine whether the general theory project in the field of international relations can be redeemed given disappointment with previous attempts to reflect on what this reveals about the possibilities and limits of general theory and to inform policy Welch argues that earlier efforts at general theory erred by aiming to explain state behavior which is an intractable problem Instead since inertia is the default expectation in international politics all we need do is to explain changes in behavior Painful Choices shows that this is a tractable problem with clear implications for intelligence analysts and negotiators

struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba s 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts

Existing explanations of this course reversal draw on the security implications of a growing crisis on the Korean Peninsula U S domestic politics and changing decision making dynamics within the Bush administration Employing before after comparison the study refutes these accounts and it offers an alternative explanation The Bush administration altered its nonproliferation policy toward North Korea toward a cooperative course because after the nuclear test it perceived fundamentally improved prospects for fruitful cooperation on North Korea s denuclearization
