

Helpful hints to identify the Slide Out Motor Assembly:

Rev: Apr-11

1. The Boot (*Not sold separately*) covers the brake assembly. Boots have different colors such as red, white, black, orange and gray. Usually the boot color indicates the torque rating of the motor assembly. Gray (low torque), Black (high torque to ultra torque) and White (ultra torque). This is a visual help when identifying a motor assembly and does not guarantee the torque rating.
2. The Brake Lever (*Not sold separately*) is under the boot on the end of the motor assembly and is proprietary to Power Gear only. This should be in the engaged position (see label on motor housing) when operating the motor assembly.
3. The Motor Housing (*Not sold separately*) holds the labels for identification of the brake lever (engaged or released) and the Power Gear part number label (p/n= part number) and the base motor label located on the opposite side of the Power Gear part number label. The circumference of the housing can vary from diameters such as 2 ½" to 3" and larger; however the larger diameter does not indicate higher torque.
