This book is an interactive approach to learning about chemistry of the carbonyl group inviting students to work through its pages with pencil and paper in hand. It educates with the belief that the most effective way to learn is by practice and interaction. With this in mind the reader is asked to predict what would happen under a specific set of reaction conditions. The book is divided into frames each frame poses a question and invites the reader to predict what will happen. Subsequent frames give the solution but then pose more questions to develop a theme further.

Presented in full colour to enhance the understanding of mechanisms within chemistry the chapters of this step by step guide cover nucleophilic addition to the carbonyl group nucleophilic substitution nucleophilic substitution at the carbonyl group with complete removal of carbonyl oxygen carbanions and enolisation and building organic molecules from carbonyl compounds.
