On The Origin Of Stories On The Origin Of Stories:

On the Origin of Stories Brian Boyd, 2010-11-15 A century and a half after the publication of *Origin of Species* evolutionary thinking has expanded beyond the field of biology to include virtually all human related subjects anthropology archeology psychology economics religion morality politics culture and art Now a distinguished scholar offers the first comprehensive account of the evolutionary origins of art and storytelling Brian Boyd explains why we tell stories how our minds are shaped to understand them and what difference an evolutionary understanding of human nature makes to stories we love Art is a specifically human adaptation Boyd argues It offers tangible advantages for human survival and it derives from play itself an adaptation widespread among more intelligent animals More particularly our fondness for storytelling has sharpened social cognition encouraged cooperation and fostered creativity After considering art as adaptation Boyd examines Homer's *Odyssey* and Dr Seuss's *Horton Hears a Who* demonstrating how an evolutionary lens can offer new understanding and appreciation of specific works What triggers our emotional engagement with these works What patterns facilitate our responses The need to hold an audience's attention Boyd underscores is the fundamental problem facing all storytellers Enduring artists arrive at solutions that appeal to cognitive universals an insight out of step with contemporary criticism which obscures both the individual and universal Published for the bicentenary of Darwin's birth and the 150th anniversary of the publication of *Origin of Species* Boyd's study embraces a Darwinian view of human nature and art and offers a credo for a new humanism

Anatomy of a Robot Despina Kakoudaki, 2014-07-07 Why do we find artificial people fascinating Drawing from a rich fictional and cinematic tradition *Anatomy of a Robot* explores the political and textual implications of our perennial projections of humanity onto figures such as robots androids cyborgs and automata In an engaging sophisticated and accessible presentation Despina Kakoudaki argues that in their narrative and cultural deployment artificial people demarcate what it means to be human They perform this function by offering us a non human version of ourselves as a site of investigation Artificial people teach us that being human being a person or a self is a constant process and often a matter of legal philosophical and political struggle By analyzing a wide range of literary texts and films including episodes from *Twilight Zone* the fiction of Philip K Dick Kazuo Ishiguro's novel *Never Let Me Go* *Metropolis* *The Golem* *Frankenstein* *The Terminator* *Iron Man* *Blade Runner* and *I Robot* and going back to alchemy and to Aristotle's *Physics* and *De Anima* she tracks four foundational narrative elements in this centuries old discourse the fantasy of the artificial birth the fantasy of the mechanical body the tendency to represent

artificial people as slaves and the interpretation of artificiality as an existential trope What unifies these investigations is the return of all four elements to the question of what constitutes the human This focused approach to the topic of the artificial constructed or mechanical person allows us to reconsider the creation of artificial life By focusing on their historical provenance and textual versatility Kakoudaki elucidates artificial people s main cultural function which is the political and existential negotiation of what it means to be a person **Writing Online and Audio Stories** Anna Faherty,2023-12-22
