economic thought until its decline in the mid fourteenth century The study focuses on exchange and value money and usury on fraud on duress and economic freedom The strong link between economic theory and the theory of property is accentuated It is based partly on familiar printed sources but a large body of previously unexplored manuscript sources are examined as well New interpretations are offered on several points of doctrine Its scope and the extent of the sources examined make this book an indispensable reference work for future research in medieval and early modern economic thought

Governing Passions Mark Greengrass, 2007-09-13 The French kingdom dissolved into civil wars known as the wars of religion for a generation from 1562 to 1598 This book examines the reactions of France's governing groups to that experience Their major political endeavour was securing peace They attempted to achieve it through a religious pluralism not envisaged in any other state on this scale in this period Its achievement would only be fulfilled however alongside a reform of the kingdom's institutions and society Peace and reform went hand in hand a moral agenda for restoration France's notables drew on reservoirs of classical and Christian moral philosophy and wisdom to find practical answers to the difficult problems of governance that confronted them The resulting public introspection and vocal debates are difficult to match anywhere else in Europe at this time They were an essential part of the profound sense of crisis that France's governing elites experienced during the later sixteenth century Drawing extensively on manuscript and printed sources not hitherto examined this book analyses for the first time the debates at the Estates General of Blois 1576-7 and the Assembly of Notables at Saint Germain en Laye of 1583-4 It shows the French polity in a fresh light presenting major issues of political thought in their public and practical context And it re-examines the crucial and little understood reign of Henri III the last Valois king suggesting how Bourbon France could have emerged very differently from the civil wars of the late sixteenth century

The Search for Truth Maxwell Bennett, 2022-05-01 Universities have searched for truth over nearly a millennium Maxwell Bennett recounts the history of this search during three of its most momentous periods in the 13th 18th and 20th centuries which helped fashion the idea of a university He concludes with a cautionary assessment of whether universities given their present level of material support can reliably continue to protect and advance society
