Pearce,1999 About one in three people in North America and Europe collects something Collecting is clearly an important social phenomenon and yet surprisingly little is known about how and why we collect On Collecting explores the nature of collecting both in Europe and among people living within the European tradition elsewhere The way people collect tells us about their notions of themselves and others about their relationship to objects and helps us understand people as consumers Susan Pearce addresses many of the important issues surrounding the practice of collecting She considers how European collecting practice is part of an essentially European mentality how collected objects have cultural value and how the individuals who collect them help to affect the society they live in      *Collecting Compensation Data from Employers* National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on Measuring and Collecting Pay Information from U.S. Employers by Gender, Race, and National Origin,2013-03-01 U S agencies with responsibilities for enforcing equal employment opportunity laws have long relied on detailed information that is obtained from employers on employment in job groups by gender and race ethnicity for identifying the possibility of discriminatory practices The U S Equal Employment Opportunity Commission EEOC the Office of Federal Contract Compliance programs of the U S Department of Labor and the Civil Rights Division of the U S Department of Justice have developed processes that use these employment data as well as other sources of information to target employers for further investigation and to perform statistical analysis that is used in enforcing the anti discrimination laws The limited data from employers do not include with a few exceptions the ongoing measurement of possible discrimination in compensation The proposed Paycheck Fairness Act of 2009 would have required EEOC to issue regulations mandating that employers provide the EEOC with information on pay by the race gender and national origin of employees The legislation was not enacted If the legislation had become law the EEOC would have been required to confront issues regarding currently available and potential data sources methodological requirements and appropriate statistical techniques for the measurement and collection of employer pay data The panel concludes that the collection of earnings data would be a significant undertaking for the EEOC and that there might be an increased reporting burden on some employers Currently there is no clearly articulated vision of how the data on wages could be used in the conduct of the enforcement responsibilities of the relevant agencies *Collecting Compensation Data from*

Iskin, Britany Salsbury, 2019-12-12 Why did collectors seek out posters and collect ephemera during the late nineteenth and the twentieth centuries How have such materials been integrated into institutional collections today What inspired collectors to build significant holdings of works from cultures other than their own And what are the issues facing curators and collectors of digital ephemera today These are among the questions tackled in this volume the first to examine the practices of collecting prints posters and ephemera during the modern and contemporary periods A wide range of case studies feature collections of printed materials from the United States Latin America France Germany Great Britain China Japan Russia Iran and Cuba Fourteen essays and one roundtable discussion all specially commissioned from art historians curators and collectors for this volume explore key issues such as the roles of class politics and gender and address historical contexts social roles value and national and transnational aspects of collecting practices The global scope highlights cross cultural connections and contributes to a new understanding of the place of prints posters and ephemera within an increasingly international art world Collecting from the Margins María Mercedes Andrade, 2016-03-23 From the cabinets of wonder of the Renaissance to the souvenir collections of today selecting accumulating and organizing objects are practices that are central to our notions of who we are and what we value Collecting both private and institutional has been instrumental in the consolidation of modern notions of the individual and of the nation and numerous studies have discussed its complex political social economic anthropological and psychological implications However studies of collecting as practiced in colonized cultures are few since the role of these cultures has usually been understood as that of purveyors of objects for the metropolitan collector Collecting from the Margins Material Culture in a Latin American Context seeks to counter the historical understanding of collecting that posits the metropolis as collecting subject and the colonial or postcolonial society as supplier of collectible objects by asking instead how collecting has been practiced and understood in Latin America Has collecting been viewed or portrayed differently in a Latin American context Does the act of collecting when viewed from a Latin American perspective unsettle the way we have become accustomed to think about it What differences if any arise in the activity of collecting in colonized or previously colonial societies Spanning the period after the independence wars until the 1980s this collection of ten essays addresses a broad range of examples of collecting practices in Latin America Collecting during the nineteenth century is addressed in discussions of the creation of the first national museums of Argentina and Colombia in the post independence period as well as in analyses of the private collections of modernistas such as Enrique G me z Carrillo Rub n Dar o Jos Asunci n Silva and Delmira Agustini at the end of the nineteenth century and the beginning of the twentieth The practice of collecting in the twentieth century is discussed in analyses of the self described revolutionary practices of Oswald de Andrade Augusto de Campos and the films of Ruy Guerra as well as the polemical collections of Pablo Neruda and the unsettling collections
