## **On Suicide Bombing On Suicide Bombing:**

**On Suicide Bombing** Talal Asad, 2007 Drawing on his extensive scholarship in the study of secular and religious traditions as well as his understanding of social political and anthropological theory and research Talal Asad questions Western assumptions regarding death and killing *Terrorist Suicide Bombings* Mordecai Dzikansky, Gil Kleiman, Robert Slater, 2011-10-10 Urban environments are prime targets for suicide bombings over the next decade While the threat may be ever present measures are available that can empower law enforcement personnel to thwart attacks or at least mitigate the effects by reducing casualties Written by professionals with first hand experience *Terrorist Suicide Bombings Attack In*

**Fighting Suicide Bombing** Israel W. Charny, 2006-11-30 How does one effectively fight suicide bombers What threat do they hold for Western society How do people who love peace reconcile the need for war Noted genocide expert Israel W Charny addresses these questions in this highly personal description of suicide bombings and terror as the opening salvos of a Third World War Charny first seeks to understand what makes suicide bombers tick as well as the culture from which they emerge Taking this understanding of what he calls human evil he then proposes a hawkish campaign that ultimately emphasizes peace rather than irrational fear By deeming suicide bombing and terrorism as necessary subjects in the study of psychology Charny presents yet another weapon in the war against terrorism a war that he believes will only escalate without drastic action Ultimately he calls for a worldwide campaign for life led by religious and secular leaders across the globe He concludes the book with a vignette from Islamic culture that speaks nobly to furthering peace and life **Suicide**

**Bombings** Riaz Hassan, 2011-04-11 In an age when the Western world is preoccupied with worries about weapons of mass destruction in terrorist hands terrorists across many parts of the globe are using a more basic device as a weapon life itself Suicide bombing has become a weapon of choice among terrorist groups because of its lethality and unrivalled ability to cause mayhem and fear but what is the real driving force behind these attacks For the first time *Suicide Bombings* analyzes concrete data from The Suicide Terrorism Database at Flinders University Australia to explain what motivates the perpetrators The results serve to largely discredit common wisdom that religion and an impressionable personality are the principal causes and show rather that a cocktail of motivations fuel these attacks which include politics humiliation revenge retaliation and altruism *Suicide Bombings* provides a short but incisive insight into this much publicized form of terrorism and as such is an informative and engaging resource for students academics and indeed anyone with an interest in this topic

**The Banality of Suicide Terrorism** Nancy Hartevelt Kobrin, 2010 Terrorist organizations have been able to market mass murder under hysteria s banner of alleged martyrdom But when it comes to understanding Islamic suicide terrorism in particular there is much more to it than martyrdom In this groundbreaking book Nancy Kobrin dismantles the psychological dynamics of suicide terrorism to help the reader gain a new perspective on one of the most destructive forces the world has witnessed to date Until now no one has explained why the mother child relationship is central to understanding Islamic

suicide terrorism The Banality of Suicide Terrorism exposes the very ordinariness of one of the deepest yet most poorly understood causes of the suicide bomber's motivation a profound terror of abandonment that is rooted in the mother child relationship According to Kobrin this terror is so great in the would be suicide terrorist that he or she must commit suicide and mass murder in the process in order to fend off that terror of dependency and abandonment Suicide terrorists seek a return to the bond with the mother of early childhood known as maternal fusion by means of a death fusion with their enemies who subconsciously represent the loved and hated maternal figure The terrorist's political struggle merely serves as cover for this emotionally terrifying inner turmoil which can lead down the path of ultimate destruction **My Life is a**

**Weapon** Christoph Reuter, 2004 What kind of people are suicide bombers How do they justify their actions In this meticulously researched and sensitively written book journalist Christoph Reuter argues that popular views of these young men and women as crazed fanatics or brainwashed automatons fall short of the mark In many cases these modern day martyrs are well educated young adults who turn themselves into human bombs willingly and eagerly to exact revenge on a more powerful enemy perceived as both unjust and oppressive Suicide assassins are determined to make a difference for once in their lives no matter what the cost As Reuter's many interviews with would be martyrs their trainers friends and relatives reveal the bombers are motivated more by how they expect to be remembered as heroic figures than by religion infused visions of a blissful life to come Reuter who spent eight years researching the book moves from the broken survivors of the children's suicide brigades in the Iran Iraq war of the 1980s to the war torn Lebanon of Hezbollah to Israeli occupied Palestinian land and to regions as disparate as Sri Lanka Chechnya and Kurdistan He tells a disturbing story of the modern globalization of suicide bombing orchestrated as his own investigations have helped to establish by the shadowy Al Qaeda network and unintentionally enabled by wrong headed policies of Western governments In a final hopeful chapter Reuter points to today's postrevolutionary post Khomeini Iran where a new social environment renounces the horrific practice in the very place where it was enthusiastically embraced just decades ago **Suicide Bombers in Iraq** Mohammed M.

Hafez, 2007 The war in Iraq was supposed to be easy Instead it has delivered the message that Islamic resistance and martyrdom can defeat the only remaining superpower just as jihadists drove the Soviet Union from Afghanistan during the 1980s Now a haven for jihadists Iraq has entered a civil war whose duration scope and magnitude have yet to be determined The overwhelming majority of suicide attacks in Iraq have targeted Iraqi security forces and Shia civilians not coalition forces The perpetrators appear to be largely non Iraqi volunteers Many are from Saudi Arabia but substantial numbers have come from Europe Syria Kuwait Jordan and North Africa They are foiling U S plans to stabilize the country and turn it into a democratic regime and an ally in a region of religious radicalism entrenched authoritarianism and hostile states with nuclear ambitions Understanding the phenomenon of suicide bombing in Iraq is therefore vitally important for U S national security foreign policy in the Muslim world and the war on terrorism This study the first of its kind on the Iraqi insurgency draws

extensively on open source intelligence and papers of record primary sources from insurgent groups including online documents and videos and interviews with U S servicemen who have served in Iraq It examines the history of suicide bombing in Iraq and many other countries theoretical perspectives on suicide bombing the varied factions that comprise the insurgency the ideology and theology of martyrdom supporting suicide bombers their national origins and characteristics and the prospects for a third generation of transnational jihadists forged in the crucible of Iraq     The Business of Martyrdom Jeffrey W Lewis,2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology The Business of Martyrdom argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows The Business of Martyrdom to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon     **The Path to Paradise** Anat Berko,2007-04-30 Suicide bombers are often compared to smart bombs From the point of view of their dispatchers they are highly effective inexpensive forms of weaponry and there is no need to

invest in their technological development Suicide bombers are in fact smarter than smart bombs because they can choose their own target and they can react to circumstances on the ground changing their target or their timing in an instant to ensure the maximum damage destruction and death Of course unlike smart bombs suicide bombers think and feel they have histories stories beliefs desires in short they have an inner world Exploring the inner world of suicide bombers has been the focus of Anat Berko's research for years She has worked to understand the thought processes of a people who can choose to place explosives on their bodies and kill themselves taking as many other people with them as they can Do male bombers really believe that death will transport them to a paradise where they will be greeted by virgins Are they victims of unbearable pressure to commit this act of terror What are female bombers promised in the hereafter Is there something that links all suicide bombers Berko also explores the world of those who drop the smart bomb the dispatchers who are these people who persuade others to go calmly to their horrific deaths

*Data Science for Suicide Bombings* Sana Rasheed, 2016-12-15 Suicide bombing has become one of the most lethal and favorite modus operandi of terrorist organizations worldwide Information technology and artificial intelligence have seen some tremendous advancement in recent years and this study is set to use the power of data sciences and predictive analytics for counterterrorism and suicide bombings This multidisciplinary research work outlines a theoretical framework for personal traumatization and also discusses the methods and ways to analyze the data to uncover trends and patterns It has also examined the use of statistical models that could help in forecasting suicide bombings

*A Handbook of Terrorism and Insurgency in Southeast Asia* Andrew T. H. Tan, 2009-01-01 This is an important and worthwhile book that should be read by anyone seeking to understand the history and evolution of political violence in Southeast Asia including the origins of contemporary militant Islamist terrorism Paul J Smith Contemporary Southeast Asia This very fine collection shows how and why Southeast Asia has been afflicted with terrorism from the end of World War II to the present time No other volume tells us as much about the period and area Anyone interested in the general theory and practice of terrorism and insurgency will find it indispensable David C Rapoport University of California Los Angeles US and Editor of Journal of Terrorism and Political Violence This stimulating collection of essays underlines how Southeast Asia has again as at the height of the Cold War been pushed towards the top of the list of world conflict zones by the collision between long standing regional problems and more recent external frictions Anyone needing to learn more about the relationship between the war on terror and Southeast Asia particularly regarding terrorism in Thailand Indonesia and the Philippines will need to consult this work Brian P Farrell National University of Singapore and author of The Defence and Fall of Singapore 1940 1942 This book is an excellent addition to the literature on political violence in Southeast Asia providing a wealth of detail on terrorism guerilla insurgency and the use of terror and repression by governments The book is especially valuable for the broad coverage of many different groups not just Islamic ones inclusion of the activities of governments and a variety of opinions and views on terrorism and political violence This

book should be one of the essential resources for academics policymakers or anyone else interested in terrorism insurgency and political violence in the region It is an extremely valuable tool for one and all James M Lutz Indiana University Purdue University US and co author of Global Terrorism with Brenda Lutz This is an excellent volume which is very well conceived and balanced in its treatment of the problem of terrorism and insurgency in Southeast Asia This volume will greatly advance our empirical understanding of conflict and violence in this pivotal region The book contains many insightful contributions and overall the Handbook will serve as a standard reference on the subject matter for years to come M L R Smith King s College University of London UK This timely and significant book seeks to explain the deep seated complexities of terrorism and insurgency in Southeast Asia In the aftermath of 9 11 this region has been designated by the United States to be the second front in the war on terrorism Yet despite the emergence of this new global terrorism the authors argue that armed rebellion in Southeast Asia is a phenomenon that predates Al Qaeda and the global Jihadist movement and that much can be learned from the motivations behind it Written by a group of leading Western and emerging Southeast Asian scholars this extensive volume demonstrates the difficulty and diversity of rebellion in Southeast Asia and explores its intricate historical political social and economic roots The book will serve as an excellent reference and educational text providing an empirical and regional guide to the complex problem of insurgency in Southeast Asia It will also contribute to a more educated understanding that could provide the basis for appropriate counter terrorism strategies in this important part of the world Comprehensive and engaging this volume will find widespread appeal amongst researchers students and policymakers interested in terrorism international relations and Asian studies and will also be an invaluable tool for studies into political violence and security

**The Smarter Bomb** Anat Berko, 2016-09 This compelling book offers a unique glimpse into the motivations of suicide bombers especially women and children and those who recruit and dispatch them As a woman and a mother Anat Berko was able to win the trust of imprisoned bombers and speak with them intimately Entering Israel s most heavily secured cells she met with female and adolescent would be suicide bombers and their dispatchers lawyers and interrogators The personal stories are greatly enriched by the inclusion of the sketches and letters many prisoners gave to the author She explores vital questions What leads individuals to place explosives on their bodies kill and injure scores of civilians and take their own lives Do men really believe that death will transport them to paradise where Allah virgins and wine await them Are women victims of unbearable pressure to commit this act of terror Can a woman be good according to the criteria of Arab Palestinian society and a terrorist at the same time Is involvement in terrorism a sign of the liberation of Palestinian women or another way of preserving their social inferiority thus explaining their low status and the inferior rewards the families of female suicide bombers receive Who are the dispatchers and how do they manipulate and convince women and youngsters to go calmly to their death The answers to these questions offer a rare and candid portrayal that will be essential reading for all those wanting to understand the interior world of suicide bombers and how to communicate with

terrorists      Fatwa on Suicide Bombings and Terrorism Muhammad Tahir-ul-Qadri, Muḥammad Ṭāhirulqādrī, 2010 The English version of the introduction to the historic fatwa on terrorism and suicide bombings This 88 page includes answers to various questions which radicals ask about suicide bombing and jihad hijacking of foreign diplomats and explains why it is not jihad      *On Suicide Bombing*: Talal Asad, 2008-01-01      **Predicting Suicide Attacks** Walt L. Perry, 2013 As part of an exploration of ways to predict what determines the targets of suicide attacks RAND conducted a proof of principle analysis of whether adding sociocultural political economic and demographic factors would enhance the predictive ability of a methodology that focused on geospatial features This test case focused on terrorist bombing incidents in Israel but the findings indicate that the methodology merits further exploration      **Understanding and Addressing Suicide Attacks** David Cook, Olivia Allison, 2007-05-30 During the past several years Americans have witnessed the frequent occurrence of suicide attacks by radical Muslim groups The public has wondered what drives someone to kill himself specifically in order to wreak havoc and destruction While other works address the subject many entirely ignore the ideological religious and cultural appeal of suicide attacks and none can adequately speak to why certain groups choose to use suicide as a weapon while others do not Beginning with a careful consideration of the religious and historical reasons and the justifications that perpetrators find therein for suicide operations the authors reveal how radical groups have co opted various aspects of their faith to provide fuel for their current activities Established policy makers seem helpless to confront this destructive terrorist activity often implying that countermeasures are ineffective and seeming to say we will just have to wait out the phenomenon Even such a well documented policy report as the 9 11 Commission s report failed to address the root of suicide attacks only critiquing technical aspects of the U S security system Focusing on specific attacks their roots their perpetrators and their outcomes the authors are able to shed light on this resurgence of radical religious forces that encourage the use of such tactics and to propose new initiatives and approaches to handling such attacks before and after they occur      Terrorists and Suicide Attacks Audrey Kurth Cronin, 2009-12 Suicide attacks by terrorist organizations have become more prevalent globally and assessing the threat of suicide attacks against the U S and its interests at home and abroad has therefore gained in strategic importance This report focuses on the following questions What are suicide attacks What have been the patterns and motivations for terrorist organizations using suicide attacks in the past What terrorist groups and other organizations are most likely to launch such attacks How great a threat are terrorist suicide attacks to the U S at home and abroad How can the U S counter such a threat The report analyzes the key lessons of the international experience with suicide attacks and examines their relevance to the U S      Suicide as a Weapon , 2007 Suicide terrorism has become the weapon of choice of globalized terror This work provides a historical review of suicide attacks It covers topics such as what is new about terrorism the mindset of the PLL terror organization reactions of security forces recruiting and training suicide bombers and the high profile of women suicide bombers      *A Devil's Triangle* Peter Brookes, 2007-03-28 In a cold hard slap across the

face of Americans Brookes warns that the terrorist threat has not subsided in the four years since 9 11 but in fact has escalated

**Life as a Weapon** Riaz Hassan, 2014-09-11 Suicide bombing has become a weapon of choice among terrorist groups because of its lethality and ability to cause mayhem and fear But who carries out these acts and what motivates them By undertaking analysis of the information in the most comprehensive suicide terrorism database in the world Life as a Weapon seeks to question and in turn undermine the common perception that the psychopathology of suicide bombers and their religious beliefs are the principal causes Instead the book presents a cocktail of motivations that drive suicide bombers and explains how their actions achieve multiple purposes community approval political success liberation of the homeland personal redemption or honour refusal to accept subjugation revenge anxiety defiance Since the configuration of these driving factors is also specifically related to the circumstances of political conflict in each different country it is only through gaining understanding and knowledge of these conditions that appropriate policies and responses can be developed that will protect the public and counter the scourge of suicide bombings Life as a Weapon is a pivotal text in the discussion surrounding suicide bombings and as such it is of relevance to undergraduate students postgraduates and researchers working in areas such as Security Studies Middle Eastern Studies Terrorism Criminology and Political Science
