Ageing with Smartphones in Ireland Pauline Garvey, Daniel Miller, 2021-05-06 There are not many books about how people get younger It doesn't happen very often But Ageing with Smartphones in Ireland documents a radical change in the experience of ageing Based on two ethnographies one within Dublin and the other from the Dublin region the book shows that people rather than seeing themselves as old focus on crafting a new life in retirement Our research participants apply new ideals of sustainability both to themselves and to their environment They go for long walks play bridge do yoga and keep as healthy as possible As part of Ireland's mainstream middle class they may have more time than the young to embrace green ideals and more money to move to energy efficient homes throw out household detritus and protect their environment The smartphone has become integral to this new trajectory For some it is an intimidating burden linked to being on the wrong side of a new digital divide But for most however it has brought back the extended family and old friends and helped resolve intergenerational conflicts though facilitating new forms of grandparenting It has also become central to health issues whether by Googling information or looking after frail parents The smartphone enables this sense of getting younger as people download the music of their youth and develop new interests This is a book about acknowledging late middle age in contemporary Ireland How do older people in Ireland experience life today Praise for Ageing with Smartphones in Ireland An innovative and thorough description and analysis of how one small piece of technology has changed the way Irish people live their lives Tom Inglis Professor Emeritus of Sociology in University College Dublin

Situational Project Management Oliver F. Lehmann,2016-08-19 Most project managers would agree that every project is unique But not all project managers would agree that the best way to manage a unique project is unique Many still cling to the old practice of having a methodology that is applied to all projects One size fits all is still in common use and this approach has proven to lead to project failure Flexibility situational intelligence and creativity are essential to deliver project success The need to recognize and master ever changing requirements and environmental conditions is a tough challenge for professional project managers The same practices that led to success yesterday may cause failure today Selecting favorable responses to a given situation is often the most critical factor of the dynamics of success and failure This book is designed to help project professionals assess a situation predict the appropriate approach methodology and achieving styles and then apply them in a situational fashion To guide project managers in selecting the appropriate responses Situational Project Management SitPM shows how to assess a given project determine its unique characteristics and select the appropriate methods to complete the project With this book projects managers can use SitPM to develop profiles of their projects on the

basis of the projects physical characteristics the project teams behavioral characteristics the enterprise environment and the market environments receiving project deliverables These profiles help project managers to determine the appropriate project life cycle approach and leadership style The book also explores various ways to engage stakeholders on the basis of a project s SitPM profile The book s author Oliver F Lehmann has developed a set of templates to apply SitPM in practice It can be downloaded from www.oliverlehmann.com/SitPM_Templates.zip The Advertising Red Books ,2008-07
