

Photography Through the Years

1816 - The first pinhole camera (Camera Obscura) was used to create an image.

1816 - Camera Obscura is used to make an image on metal plates coated with chemicals. This was when the first permanent photograph was taken. It took 8 hours to take the photograph.

1817 - The first glass negative was used by Nicéphore Niépce which featured exposure to make a negative and then processing it with chemicals to develop and fix the image. These plates were one of a kind and took only 8 minutes to take the photo.

1826 - The first hand-held camera (camera) was used. This camera had 8 holes in it.

1839 - The wet collodion process became the standard as the photographs made by this method are more detailed and sharper than the wet reflective process produce a negative that can be used to make duplicate plates.

1841 - First color photograph was made by taking multiple images through red, green, and blue filters. Then these images were combined to make a colored image.

1851 - Kodak made the first film camera, which had a 12-foot film of that first roll of film. The made photographs available to all. These photographs were 1/3 inches.

1861 - The first 1/2 image lens reflect camera, Kodak. This camera used a single lens camera and a prism system which allowed the photographer to see exactly what would be seen by the camera.

1861 - First flexible medium plate.

1871 - Eastman Kodak introduced the first digital camera that replaced plates as the sensor. Digital cameras capture more photos than film.

1981 - Nikon offered the first 35mm digital single lens reflect camera, which combined a digital imaging sensor with the mechanism and optics of a single lens reflect camera.
