Nice Failures Imagination Deadliest Threats Homeland:

Failures of Imagination Michael McCaul, 2016 The sitting chairman of the Homeland Security Committee who receives daily intelligence about threats materializing against America depicts in real time the hazards that he believes are closer than we realize From cyberwarriors who can cripple the Eastern seaboard to radicalized Americans in league with Islamic jihadists to invisible biological warfare many of the most pressing dangers are the ones he feels we've heard about the least and are doing the least about Amazon.com

Meth Wars Travis Linnemann, 2018-08-28 How the War on Drugs is maintained through racism authority and public opinion From the hit television series Breaking Bad to daily news reports anti drug advertising campaigns and highly publicized world wide hunts for narcoterrorists such as Joaquin El Chapo Guzman the drug methamphetamine occupies a unique and important space in the public's imagination In Meth Wars Travis Linnemann situates the meth epidemic within the broader culture and politics of drug control and mass incarceration Linnemann draws together a range of examples and critical interdisciplinary scholarship to show how methamphetamine and the drug war more generally are part of a larger governing strategy that animates the politics of fear and insecurity and links seemingly unrelated concerns such as environmental dangers the politics of immigration and national security policing tactics and terrorism The author's unique analysis presents a compelling case for how the supposed meth epidemic allows politicians small town police and government counter narcotics agents to engage in a singular policing project in service to the broader economic and geostrategic interests of the United States

Reconfiguring Refugees Alise Coen, 2024-08-20 Shows how domestic identity narratives and political polarization shape the sociopolitical response to refugees The United States once played a major role in global refugee resettlement accounting for nearly two thirds of all refugees resettled worldwide However in recent years it has dramatically cut refugee admissions and implemented discriminatory policies on refugee protection These policies have been justified amid intensifying xenophobic rhetoric against specific groups In this book Alise Coen explains why the monumental shift around refugee resettlement occurred particularly in response to the high profile conflict in Syria She shows how refugees and broader global migration debates became contentious political issues in the US revealing the many ways in which refugees have been increasingly weaponized as partisan symbols by Democrats and Republicans The book calls attention to the power of rhetoric and identity narratives and shows how the language used to talk about refugees fuels divisive policies From the years leading up to the Trump administration's policies targeting Muslim refugees to debates during the Biden administration around who deserves access to asylum Coen examines how ideas about race gender and nativism shape US approaches toward migration As arguments for closing the border continue to gain traction and politicians continue to use global displacement issues to further their agendas Reconfiguring Refugees explores the ideas meanings and policies that undermine and influence US responsibility sharing

The Homeland Security Dilemma Frank P. Harvey, 2012-12-06 This book explores the paradox of the security dilemma in

International Relations as applied to the post 9 11 context of homeland security The book s central argument can be summed up by the following counterintuitive thesis the more security you have the more security you will need It argues that enhancing security does not make terrorism more likely but rather it raises public expectations and amplifies public outrage after subsequent failures The book contests that this dilemma will continue to shape American Canadian and British domestic and international security priorities for decades In exploring the key policy implications resulting from this the book highlights the difficulty in finding a solution to this paradox as the most rational and logical policy options are part of the problem This book will be of interest to students of Homeland Security Security Studies US politics and IR in general

Fear Robert Peckham,2023-09-07 Extraordinary Ai Weiwei Brilliant Simon Schama Fear has long been a driving force perhaps the driving force of world history a coercive tool of power and a catalyst for radical change Here Robert Peckham traces its transformative role over a millennium from fears of famine and war to anxieties over God disease technology and financial crises In a landmark global history that ranges from the Black Death to the terror of the French Revolution the AIDS pandemic to climate change Peckham reveals how fear made us who we are and how understanding it can equip us to face the future

Human Geopolitics Alan Gamlen,2019-05-02 Human geopolitics the competition for population rather than territory is an essential but weakly understood dimension of world politics today Such competition has preceded violent conflict throughout history but has been muted since the Treaties of Westphalia laid the territorial foundations of the modern international system in the mid seventeenth century Today however human geopolitics is being resurrected in unanticipated ways as governments are enabled and encouraged to engage their emigrant diasporas How and why is this happening Until now these questions have been difficult to answer The majority of research attention has focused on questions of immigration policy in a handful of wealthy migrant destination countries largely ignoring the emigration policies that preoccupy the worlds many migrant origin states This book addresses that research imbalance by focusing on the overlooked sending side of migration policy Drawing on data covering all UN members across the post WWII period and fieldwork with high level policy makers across 60 states and a dozen international organisations the book charts the re emergence of human geopolitics through the global spread of diaspora institutions government ministries and offices dedicated to emigrants and their descendants It calls for the development of stronger guiding principles and evaluation frameworks to govern these new state diaspora relations in an era of unprecedented global interdependence

Explaining Foreign Policy in Post-Colonial Africa Stephen M. Magu,2021-01-02 This book explores foreign policy developments in post colonial Africa A continental foreign policy is a tenuous proposition yet new African states emerged out of armed resistance and advocacy from regional allies such as the Bandung Conference and the League of Arab States Ghana was the first Sub Saharan African country to gain independence in 1957 Fourteen more countries gained independence in 1960 alone and by May 1963 when the Organisation of African Unity OAU was formed 30 countries were independent An early OAU committee was the African

Liberation Committee ALC tasked to work in the Frontline States FLS to support independence in Southern Africa Pan Africanists in alliance with Brazzaville Casablanca and Monrovia groups approached continental unity differently and regionalism continued to be a major feature Africa's challenges were often magnified by the capitalist democratic versus communist socialist bloc rivalry but through Africa's use and leveraging of IGOs the UN UNDP UNECA GATT NIEO and others to advance development the formation of the African Economic Community OAU's evolution into the AU and other alliances belied collective actions even as Africa implemented decisions that required cooperation *uti possidetis* maintaining colonial borders containing secession intra and inter state conflicts rebellions and building RECs and a united Africa as envisioned by Pan Africanists worked better collectively

Against Sacrifice Henry P Wynn, 2021-08-17 This book is directed at the sort of raw utilitarian approach to making hard choices in public life which uses in one form or another the idea of the cash value of a human life This arises with the use of so called QALYs in Health Economics and spending caps in Health and Safety at work
