Kennard Peter Kennard,2019-08-20 This fully illustrated anthology showcases key images from Peter Kennard's work as Britain's foremost political artist over the last fifty years. The book centres around Kennard's images, photomontages and illustrations from protests year by year which provoked public outrage including Israel/Palestine protests, anti-nuclear protests, responses to austerity, climate destruction and more. Each image is accompanied by captions detailing not only the events in question but Kennard's approach to the work including the genesis of the images and the techniques employed. Ultimately the book highlights Kennard's extraordinary contribution to political art in the twenty-first century. **The British Journal of Photography** William Crookes, T.A. Camp, Verena Schoepf, Peter J. Mumby, David J. Suggett, 2019-01-22 Examination of corals and reef-associated organisms which endure in extreme coral reef environments is challenging our understanding of the conditions that organisms can survive under. By studying individuals naturally adapted to unfavorable conditions, we begin to better understand the important traits required to survive rapid environmental and climate change. This Research Topic comprising reviews and original research articles demonstrates the current state of knowledge regarding the diversity of extreme coral habitats, the species that have been studied, and the knowledge to date on the mechanisms, traits and trade-offs that have facilitated survival. *The Photographic News*, 1890 **Future North** Janike Kampevd Larsen, Peter Hemmersam, 2018-04-09 The changing Arctic is of broad political concern and is being studied across many fields. This book investigates ongoing changes in the Arctic from a landscape perspective. It examines settlements and territories of the Barents Sea Coast, Northern Norway, the Russian Kola Peninsula, Svalbard and Greenland from an interdisciplinary design-based and future-oriented perspective. The Future North project has travelled Arctic regions since 2012, mapped landscapes and settlements, documented stories and practices, and discussed possible futures with local actors. Reflecting the multidisciplinary nature of the project, the authors in this book look at political and economic strategies, urban development, land use strategies and local initiatives in specific locations that are subject to different forces of change. This book explores

current material conditions in the Arctic as effects of industrial and political agency and social initiatives It provides a combined view on the built environment and urbanism as well as the cultural and material landscapes of the Arctic The chapters move beyond single disciplinary perspectives on the Arctic and engage with futures cultural landscapes and communities in ways that build on both architectural and ethnographic participatory methods The American Photo Engraver ,1944 **101 Quick and Easy Secrets to Create Winning Photographs** Matthew Bamberg,2009 Discover how to take compelling photographs utilizing all the awesome features of your digital camera 101 Quick and Easy Secrets to Create Winning Photographs shows you how to use composition and technical methods and creative and artistic applications to achieve amazing images using both in camera and post processing techniques Every chapter covers a different overall theme with each technique laid out in a two page spread that features easy to follow instructions to achieve the shot and stunning full color photographs showing the results You ll learn how to manipulate images with light and shadow make people and animals look more lifelike create a mood using the weather make colors pop and even add unusual effects to your photographs Each image incorporates different photography skills or specific camera features so you really discover how to get the most out of your digital camera One part photo essay collection and one part how to 101 Quick and Easy Secrets to Create Winning Photographs is perfect for new digital camera owners who are eager to learn how to get amazing photographs **Chicano and Chicana Art** Jennifer A. Kripal, 2011-09-07 Jeffrey Kripal here recounts the spectacular history of Esalen the institute that has long been a world leader in alternative and experiential education and stands today at the center of the human potential movement Forged in the literary and mythical leanings of the Beat Generation inspired in the lecture halls of Stanford by radical scholars of comparative religion the institute was the remarkable brainchild of Michael Murphy and Richard Price Set against the heady backdrop of California during the revolutionary 1960s Esalen recounts in fascinating detail how these two maverick thinkers sought to fuse the spiritual revelations of the East with the scientific revolutions of the West or to combine the very best elements of Zen Buddhism Western psychology and Indian yoga into a decidedly utopian vision that rejected the dogmas of conventional religion In their religion of no religion the natural world was just as crucial as the spiritual one science and faith not only commingled but became staunch allies and the enlightenment of the body could lead to the full realization of our development as human beings An impressive new book Kripal has written the definitive intellectual history of the ideas behind the institute San Francisco Chronicle Kripal examines Esalen's extraordinary history and evocatively describes the breech birth of Murphy and Price's brainchild His real achievement though is effortlessly synthesizing a dizzying array of dissonant phenomena Cold War espionage ecstatic religiosity incongruous pairings Darwinism Tantric sex and otherwise schizy ephemera psychedelic drugs spaceflight into a cogent satisfyingly complete narrative Atlantic Monthly Kripal has produced the first all encompassing history of Esalen its intellectual social personal literary and spiritual passages Kripal brings us up to date and takes us deep beneath historical surfaces in this definitive elegantly written book Playboy *Big data and artificial intelligence in ophthalmology* Tae-im Kim, Darren Shu Jeng Ting, Yi-Ting Hsieh, Tyler Hyungtaek Rim, 2023-03-17 **Applications of Small Unmanned Aircraft Systems** J.B. Sharma, 2019-10-18 Advances in high spatial resolution mapping capabilities and the new rules established by the Federal Aviation Administration in the United States for the operation of Small Unmanned Aircraft

Systems sUAS have provided new opportunities to acquire aerial data at a lower cost and more safely versus other methods. A similar opening of the skies for sUAS applications is being allowed in countries across the world. Also, sUAS can access hazardous or inaccessible areas during disaster events and provide rapid response when needed.

Applications of Small Unmanned Aircraft systems: Best Practices and Case Studies is the first book that brings together the best practices of sUAS applied to a broad range of issues in high spatial resolution mapping projects. Very few sUAS pilots have the knowledge of how the collected imagery is processed into value added mapping products that have commercial and/or academic import. Since the field of sUAS applications is just a few years old, this book covers the need for a compendium of case studies to guide the planning, data collection, and most importantly, data processing and map error issues with the range of sensors available to the user community.

Written by experienced academics and professionals, this book serves as a guide on how to formulate sUAS based projects from choice of a sUAS, flight planning for a particular application, sensors and data acquisition, data processing, software, mapping software, and use of the high spatial resolution maps produced for particular types of geospatial modeling.

Features:

- Focus on sUAS based data acquisition and processing into map products
- Broad range of case studies by highly experienced academics
- Practical guidance on sUAS hardware, sensors, and software utilized
- Compilation of workflow insights from expert professors and professionals
- Relevant to academia, government, and industry
- Positional and thematic map accuracy
- UAS curriculum development and workflow replicability issues

This book would be an excellent text for upper level undergraduate to graduate level sUAS mapping application courses. It is also invaluable as a reference for educators designing sUAS based curriculum as well as for potential sUAS users to assess the scope of mapping projects that can be done with this technology.
