Restructuring, Labour and the Challenges for Transnational Solidarity Andreas Bieler, Ingemar Lindberg, 2010-10-04

Globalisation has put national labour movements under severe pressure due to the increasing transnationalisation of production with the production of many goods being organised across borders and the informalisation of the economy. Through a range of case studies this volume examines the possibilities and obstacles to transnational solidarity of labour in a period of global restructuring and changing global political economy. It brings together a range of international and transnational case studies examining successful and failed transnational solidarity covering inter trade union co operation as well as co operation between trade unions and social movements within the formal and informal economy and the public and private sector. It is structured in six parts and examines Globalisation and the new challenges for transnational solidarity. Inter trade union co operation across borders. The dynamics of co operation between trade unions and social movements across borders looking at developing and developed countries. The struggles to defend the public sector against private service providers. The possible ways forward towards transnational solidarity of formal and informal labour in the global economy. This book will be of interest to students and scholars of International Political Economy, International Relations, Industrial Relation, Globalisation, Geography and History.

Marxism and National Identity Robert Stuart, 2006-06-01. Post Marxists argue that nationalism is the black hole into which Marxism has collapsed at today's end of history. Robert Stuart analyzes the origins of this implosion revealing a shattering collision between Marxist socialism and national identity in France at the close of the nineteenth century. During the time of the Boulanger crisis and the Dreyfus affair nationalist mobs roamed the streets chanting France for the French while socialist militants marshaled proletarians for world revolution. This is the first study to focus on those militants as they struggled to reconcile Marxism's two national agendas: the cosmopolitan conviction that workingmen have no country on the one hand and the patriotic assumption that the working class alone represents national authenticity on the other. Anti-Semitism posed a particular problem for such socialists not least because so many workers had succumbed to racist temptation. In analyzing the resultant encounter between France's anti-Semites and the Marxist Left, Stuart addresses the vexed issue of Marxism's involvement with political anti-Semitism.

Each chapter of this text begins with an overview essay written by the authors followed by two relevant and engaging articles culled from a wide variety of popular, academic and governmental sources. This is the only major terrorism text to incorporate readings from top terrorism experts into a traditional textbook format allowing readers to deepen their understanding of each aspect of terrorism.

Reporting Genocide David Patrick, 2017-12-13 The Western world's responses to genocide have been slow unwieldy and sometimes unfit for purpose So argues David Patrick in this essential new contribution to the aid and intervention debate While the UK and US have historically been committed to the ideals of human rights freedom and equality their actual material reactions are more usually dictated by geopolitical noise pre conceived ideas of worth and the media attention spans of individual elected leaders Utilizing a wide ranging quantitative analysis of media reporting across the globe Patrick argues that an over reliance on the Holocaust as the framing device we use to try and come to terms with such horrors can lead to slow responses misinterpretation and category errors in both Rwanda and Bosnia much energy was expended trying to ascertain whether these regions qualified for genocide status The Reporting of Genocide demonstrates how such tragedies are reduced to stereotypes in the media framed in terms of innocent victims and brutal oppressors which can over simplify the situation on the ground This in turn can lead to mixed and inadequate responses from governments Reporting on Genocide also seeks to address how responses to genocides across the globe can be improved and will be essential reading for policy makers and for scholars of genocide and the media
