*New Orleans* Peirce Fee Lewis, 2003 But in meeting them the city's diverse ethnic groups French Spanish Anglo America and African American have created a place with a history and culture unlike any other in North America **New Orleans** Peirce F. Lewis, 2007 This classic work in historical geography first published in 1976 and then issued by the Center for American Places as a Second Edition in 2003 recounts the evolution of New Orleans from its founding as a European city in the early seventeenth century up to the present time including in this edition updates on how Hurricane Katrina has affected the city The city's geographic location at the entry to the Mississippi North America's largest river has helped to shape the economic social and demographic character of New Orleans for nearly 300 years In the midst of the Mississippi's huge swampy delta the city's inhabitants have confronted an array of seemingly impossible environmental challenges In meeting them the city's diverse ethnic groups French Spanish Anglo American and African American residents created a place with a history and culture unlike any other in North America Here presented in a Third Edition that includes new material and photographs on the effects of Hurricane Katrina *New Orleans The Making of an Urban Landscape* tells the story of how this remarkable city acquired its special personality and geographic shape and what challenges now lie ahead for its civic revival Distributed for the Center for American Places *New Orleans* Peirce Fee Lewis, Karen Kingsley, 2017 By weaving in a single narrative the city's siting geography spatial qualities culture economy society and tragedy it affords us an exceptional insight into the city as it is today and remains a passionate journey through one of our nation's most fascinating places from Karen Kingsley's foreword In his now classic work of historical geography originally published in 1976 Lewis traces the rise and expansion of New Orleans through four major historical periods Newly reissued by the University of Virginia Press this second edition offers a revised and greatly expanded look at this unique community on the Mississippi Delta a fearsome place difficult enough for building houses lunacy for wharves and skyscrapers with a new foreword that situates Lewis's work post Katrina and argues that it remains as insightful and compelling today as it was before the hurricane made landfall in August 2005 **New Orleans** Peirce Lewis, 2007-02 This classic work in historical geography first published in 1976 and then issued by the Center for American Places as a Second Edition in 2003 recounts the evolution of New Orleans from its founding as a European city in the early seventeenth century up to the present time including in this edition updates on how Hurricane Katrina has affected the city The city's geographic location at the entry to the Mississippi North America's largest river has helped to shape the economic social and demographic character of New Orleans for nearly 300 years In the midst of the Mississippi's huge swampy delta the city's inhabitants have confronted an array of seemingly impossible environmental challenges In meeting them the city's diverse ethnic groups French Spanish Anglo American and African American residents created a place with a history and culture unlike any other in North America Here presented in a Third Edition that includes new material and photographs on the effects of Hurricane Katrina *New Orleans The Making of an Urban Landscape* tells the

story of how this remarkable city acquired its special personality and geographic shape and what challenges now lie ahead for its civic revival Distributed for the Center for American Places **New Orleans** Peirce Fee Lewis,1976 **New Orleans** Peirce Fee Lewis,1976 **Transforming New Orleans and Its Environs** Craig Colten,2011-12-09 Human settlement of the Lower Mississippi River Valley especially in New Orleans the region s largest metropolis has produced profound and dramatic environmental change From prehistoric midden building to late twentieth century industrial pollution Transforming New Orleans and Its Environs traces through history the impact of human activity upon the environment of this fascinating and unpredictable region In eleven essays scholars across disciplines including anthropology architecture history natural history and geography chronicle how societies have worked to transform untamed wetlands and volatile floodplains into a present day sprawling urban center and industrial complex and how they have responded to the environmental changes brought about by the disruption of the natural setting This new text follows the trials of native and colonial settlers as they struggled to shape the environment to fit the needs of urbanization It demonstrates how the Mississippi River while providing great avenues for commerce transportation and colonization also presented the region s greatest threat to urban centers and details how engineers set about taming the mighty river Also featured is an analysis of the impact of modern New Orleans upon the surrounding rural parishes and the effect urban pollution has had on the city s water supply and aquatic life **Selling EthniCity** Prof Dr Olaf Kaltmeier,2012-11-28 Bringing together a multidisciplinary team of scholars this book explores the importance of ethnicity and cultural economy in the post Fordist city in the Americas It argues that cultural political and economic elites make use of cultural and ethnic elements in city planning and architecture in order to construct a unique image of a particular city and demonstrates how the use of ethnicized cultural production such as urban branding based on local identities by the economic elite raises issues of considerable concern in terms of local identities as it deploys a practical logic of capital exchange that can overcome forms of cultural resistance and strengthen the hegemonic colonization of everyday life At the same time it shows how ethnic communities are able to use ethnic labelling of cultural production ethnic economy or ethno tourism facilities in order to change living conditions and to empower its members in ways previously impossible Of wide ranging interest across academic disciplines this book will be a useful contribution to Inter American studies Repairing Infrastructures Christopher R. Henke,Benjamin Sims,2020-10-13 An investigation of the causes and consequences of the strange ambivalent and increasingly central role of infrastructure repair in modern life Infrastructures communication food transportation energy and information are all around us and their enduring function and influence depend on the constant work of repair In this book Christopher Henke and Benjamin Sims explore the causes and consequences of the strange ambivalent and increasingly central role of infrastructure repair in modern life Henke and Sims offer examples from local to global to investigate not only the role of repair in maintaining infrastructures themselves but also the social and political orders that are created and sustained through them Repair can encompass not only the kind of

work we most commonly associate with the term but also any set of practices aimed at restoring a sense of normalcy or credibility to the places and institutions we inhabit in everyday life From cases as diverse as the repair of building systems on a university campus a conflict over retrofitting a bridge while protecting murals painted on it and the global challenge posed by climate change Henke and Sims assemble a range of examples to illustrate key conceptual points about the role of repair They show that repair is an essential if often overlooked aspect of understanding the broader impact and politics of infrastructures Understanding repair helps us better understand infrastructures and the scope of their influence on our lives

*Hurricane Katrina in Transatlantic Perspective* Romain Huret, Randy J. Sparks, 2014-12-15 There is no such thing as a natural disaster writes Romain Huret in his introduction to this multidisciplinary study of the events surrounding and the legacy of Hurricane Katrina Though nature produced Katrina s rising waters and destructive winds a vast array of manmade factors shaped the scope of the storm s impact as well as the local and national response to it In *Hurricane Katrina in Transatlantic Perspective* American and European scholars approach this infamous storm and its aftermath through a variety of disciplines from music to geography to anthropology creating a nuanced understanding of how society reacts to and later remembers times of disaster Richard Campanella and Romain Huret examine the particular geographical and political mix that set the stage for Katrina s devastation especially among the poorest populations of New Orleans and the Gulf South Jean Kempf James Boyden Andrew Diamond and Thomas Jessen Adams address the ideological biases and racial stereotypes that infused local and national commentary in the days and weeks after the storm Finally Bruce Raeburn Sara Le Menestrel Anne M Lovell and Randy J Sparks explore the impact of this powerful tropical event on the city s institutions and cultural organizations *Hurricane Katrina in Transatlantic Perspective* offers a profound and innovative collection of insights on one of the most significant environmental catastrophes in U S history forcing us to examine the cultural actors that transformed a natural disaster into a humanitarian crisis

**Charter Schools, Race, and Urban Space** Kristen L. Buras, 2014-07-17 Charter schools have been promoted as an equitable and innovative solution to the problems plaguing urban schools Advocates claim that charter schools benefit working class students of color by offering them access to a portfolio of school choices In *Charter Schools Race and Urban Space* Kristen Buras presents a very different account Her case study of New Orleans where veteran teachers were fired en masse and the nation s first all charter school district was developed shows that such reform is less about the needs of racially oppressed communities and more about the production of an urban space economy in which white entrepreneurs capitalize on black children and neighborhoods In this revealing book Buras draws on critical theories of race political economy and space as well as a decade of research on the ground to expose the criminal dispossession of black teachers and students who have contributed to New Orleans culture and history Mapping federal state and local policy networks she shows how the city s landscape has been reshaped by a strategic venture to privatize public education She likewise chronicles grassroots efforts to defend historic schools and neighborhoods against this assault
