[The Political Economy of Education](#) Martin Carnoy,2024-02-15 The Political Economy of Education provides academically rigorous yet clear explanations of the economics and politics driving today's educational systems and how economists analyze them The book covers a host of topics central to teaching about education and crucial to educational policy These include how to use the tools of economic and political theory to take critical measure of education's role in social mobility and economic growth whether good teachers can overcome social class and race achievement gaps the effectiveness of early

childhood and vocational education and debates on school accountability and whether increasing spending on schooling improves quality The book also explores worldwide changes in higher education especially massification and increased stratification and privatization Written for upper undergraduate and graduate students in economics public policy and education and packed with real world examples this is an essential text for anyone interested in gaining fresh and international perspectives on education   **Emotional Labour and Lesson Observation** Ursula Edgington,2016-11-21 This book presents research on emotion work and the emotional labour of teaching and learning based in England s further education sector where an increasing emphasis on marketised systems means accountability and audit cultures have become embedded within everyday teaching practice Uniquely this book explores micro level issues of the managerial policies relating to classroom lesson observations as well as the profoundly emotional philosophical aspects of these situations which research asserts cause stress and anxiety for many staff Drawing on theoretical psychosocial concepts exploring the interplay of hidden or underground micro and macro elements of teaching and learning contexts the book illuminates how the presence of an observer fundamentally alters the dynamics of a classroom The author argues that it is not necessarily the performativity that creates the stress and anxiety in an observation but the individual s perception of this performativity and how it relates to a wider consideration of their emotional labour in the classroom For this reason the book puts forward a case for ending the formal graded method of lesson observations in favour of a developmental holistic approach that is sensitive to the emotional nuances of the individuals involved as well as the social and historical contexts of the institutions in which they are situated The diverse use of lesson observations as a tool for staff development and quality assurance policies make this a valuable resource for educational researchers policy makers teachers and managers from many different sectors and backgrounds   *The Character and Logical Method of Political Economy* John Elliott Cairnes,1869 The work on the Character and Logical Method of Political Economy may be recommended to students as a safe guide to help them through the mazy labyrinths which the earlier stages of the study present The purpose of the work is to ascertain the true relation of Political Economy to the Physical Sciences on the one hand and to the Moral Sciences on the other both as regards method and compass The supporters and opponents of Political Economy have each done it injustice by misapprehending its aims and limits The study as Professor Cairnes points out and explains with inimitable clearness does not consist in an investigation into the causes of physical facts or the evolution of psychological processes Political Economy begins at the point at which physical science and psychological science each end   Towards Teaching in Public Mike Neary,Les Bell,Howard Stevenson,2012-02-02 Towards Teaching in Public Reshaping the Modern University explores how the contested relationships between policy curriculum and pedagogy are reshaping the modern university and examines the impact of conceptualisations of teaching in public on this debate in this age of academic capitalism It traces the emergence of strategies for open access with particular reference to the contribution of technology and e learning to the emergence of

teaching in public as a critique of current educational policy The contributors combine policy analysis with a consideration of pedagogical issues and an exploration of the student experience This collection draws together chapters by experienced scholars and practitioners within the field of teaching and learning in higher education   **Mending Walls** Richard A.
