The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified

Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based. In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research. Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region.

Quest for World-Class Teacher Education? Jun Li, 2016-07-25 Utilizing a case study method and a Multiperspectival Approach this volume presents a pioneering in depth study about China's teacher education policy since the 1990s. It critically investigates the rational dynamic and complex implementation process taking place at the micro institutional level for the transformations of teacher education institutions. The book first introduces the sociopolitical and cultural background of China's teacher education system and its challenges under the condition of globalization and illustrates major national initiatives for nurturing highly qualified teachers. It then explores new teachers' identities in an era of enhanced professionalism, uncovers the ways they reflect China's teacher education reform and distills the rationales behind these policy actions. This is followed by an analytic presentation of the findings of the case study of a provincial normal university with a particular focus on such core pieces of the implementation jigsaw as policy flow, the dynamism of implementation, sociopolitical and cultural confluence and institutional barriers in the complex process. Lastly the book unravels key recommendations and implications for policy implementation studies from the China policy case and constructs a Chinese Zhong Yong Model of policy implementation and sheds new light on policy studies of teacher education reform in particular and public policy in general which may be transferable to other sociopolitical contexts seeking to nurture world class teachers and achieve educational excellence in a global age.

Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education. Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980s combined with a widespread belief in leadership as the single most powerful contribution to such improvement. The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well. During the two year period during which this current handbook was being written activity in the realms of school leadership, school improvement and leadership development gained further momentum. The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection.

preparation and development Innovative Practices in Pre-Service Teacher Education ,2019-02-11 Pre service teacher education is a crucial component of the lifelong process of the professional development of teachers as it equips prospective teachers with the necessary and sufficient competencies to design meaningful and authentic learning environments that engage students in the learning process If done well it enhances the quality and improves upon the retention of teachers in the profession This book is important because it attempts to deconstruct the nature and describe the practice of current pre service courses and programs in the Asia Pacific region examine new paradigms of pre service teacher education and their implications for practice and explore emerging innovative practices Moreover this book s particular focus on engaging new partners and on harnessing required resources and capacities in the process together with the particular role that new technologies may play in the new partnerships is especially valuable Drawing upon leading scholars of teacher education from the Asia Pacific region the 12 chapters in this book are divided into three main sections to revitalize and inform the scholarship and debate on teacher education Examining Pre Service Teacher Education Engaging Partners in Pre Service Teacher Education Emerging Practices in Pre Service Teacher Education New Paradigm for Re-engineering Education Yin Cheong Cheng,2006-01-17 In response to the challenges of globalization and local development educational reforms are inevitably becoming one of the major trends in the Asia Pacific Region or other parts of the world Based on the most recent research and international observations this book aims to present a new paradigm including various new concepts frameworks and theories for reengineering education This book has 21 chapters in three sections Section I New Paradigm of Educational Reform containing eight chapters illustrates the new paradigm and frameworks of reengineering education fostering human development and analysing reform policies and also discusses the trends and challenges of educational reforms in the Asia Pacific Region Section II New Paradigm of Educational Leadership with five chapters aims to elaborate how the nature role and practice of school leadership can be transformed towards a new paradigm and respond to the three waves of education reforms Section III Reengineering School Management for Effectiveness with eight chapters aims to provide various practical frameworks for reengineering school management processes and implementing changes in school practices *Preparing Teachers for the 21st Century* Xudong Zhu,Kenneth Zeichner,2013-12-16 This book addresses two main questions namely how to prepare high quality teachers in the 21st century and how the East and the West can learn from each other It addresses the different challenges and dilemmas that eastern countries especially China and western countries are facing with regard to teacher education We explore the question by examining teacher education research practice and policy in different countries identifying both common problems and country specific challenges We then try to find valuable experiences theories and practice which can solve specific problems in the process of teacher education also addressing how local and global factors impact it In this regard our approach does not strictly separate pre service teacher education from teachers in service professional development adopting an integrative perspective Further we believe the

respective social and cultural contexts must also be taken into account Lastly we call for teachers knowledge and individual character traits to be accounted for in the education of high quality teachers
