Active Landscape Photography Anne Godfrey, 2022-09-28 How can photography be transformed into an active process of investigation for landscape architecture and environmental design The second book in Godfrey's series Active Landscape Photography presents engaged photographic methods that turn photography into a rigorous thoughtful endeavor for the research planning and design of landscape places Photography is the most ubiquitous and important form of representation in these disciplines Yet photography is not specifically taught as a core skill within these fields This book creates a starting point for filling this gap Concepts and working methods from contemporary photography and critical cultural theories are contextualized into situations encountered in the daily practice of landscape architecture and environmental design These methods can be integrated into practices in academic and professional settings or picked up and self taught by an individual reader Part I Methods presents easily accessible approaches to photography creating a core set of active skills Part II Practices discusses working methods of specific contemporary photographers and extrapolates their practices into common extrapolates their practices into common planning and design situations Contemporary photographers presented include Richard Misrach Dawoud Bey Duane Michals Latoya Ruby Frazier Mark Klett Sophie Calle Joe Deal Robert Adams Naima Green Bernd and Hilla Becher Stephen Shore David Hockney Amy Sherald William Christenberry Jeff Wall and Sohei Nishino Beautifully illustrated in full color with over 150 images by Godfrey her students and contemporary photographers this book provides both clear guidelines for a set of diverse methods as well as a deeper discussion about the implications of making and using photography in environmental design for professionals academics students and researchers Seoul Rafael Luna, 2024-04-30 This book focuses on understanding how a megacity like Seoul can be read as a formal architectural composition and not an endless urban sprawl In a broader sense the book discusses the dichotomy between city and urbanization city being an architectural problem of bounded forms while urbanism is an infrastructural project of expansion It is an uncontested reality that urbanization is a continuous global process that has produced nebulous conurbations labeled as megacities These expand beyond the virtual administrative boundary of any said city producing a discrepancy between an area of administrative control and the real physical condition of human settlement If there were a better formal understanding of megacities through their typological architectural conditions then there could be a better assessment of the qualitative state of urbanization Avant garde groups from the 1950s 1960s and 1970s such as Team X the Situationist the Structuralist and the Metabolist worked with ideas of megaforms and megastructures to address this issue Although most of these proposals remained as paper architecture this book reevaluates some of these ideas for the 21st century megacity using Seoul as a case study due to its clear typological formations produced over its different periods of governance The aim is to present the concept for an infra architectural hybrid model of typological islands and subterranean megastructure that organizes Seoul as a flexible multi linear city This book will be of interest to academics and students of architecture urban geography and Asian studies **Chase's Calendar of Events 2018** Editors of Chase's, 2017-09-26 Find out what's going on

Collision Pete Gershon,2018-09-10 Winner 2019 Ron Tyler Award for Best Illustrated Book sponsored by the Texas State Historical Association TSHA In this expansive and vigorous survey of the Houston art scene of the 1970s and 1980s author Pete Gershon describes the city s emergence as a locus for the arts fueled by a boom in oil prices and by the arrival of several catalyzing figures including museum director James Harithas and sculptor James Surls Harithas was a fierce champion for Texan artists during his tenure as the director of the Contemporary Arts Museum Houston CAM He put Texas artists on the map but his renegade style proved too confrontational for the museum s benefactors and after four years he wore out his welcome After Harithas s departure from the CAM the chainsaw wielding Surls established the Lawndale Annex as a largely unsupervised outpost of the University of Houston art department Inside this dirty cavernous warehouse a new generation of Houston artists discovered their identities and began to flourish Both the CAM and the Lawndale Annex set the scene for the emergence of small downtown artist run spaces including Studio One the Center for Art and Performance Midtown Arts Center and DiverseWorks Finally in 1985 the Museum of Fine Arts presented Fresh Paint The Houston School a nationally publicized survey of work by Houston painters The exhibition capped an era of intensive artistic development and suggested that the city was about to be recognized along with New York and Los Angeles as a major center for art making activity Drawing upon primary archival materials

contemporary newspaper and magazine accounts and over sixty interviews with significant figures Gershon presents a narrative that preserves and interweaves the stories and insights of those who transformed the Houston art scene into the vibrant community that it is today
