Guidelines for the Design of Footbridges fib Fédération internationale du béton, 2005-01-01 The intention of fib Bulletin 32 is to present guidelines for the design of footbridges as well as bridges accommodating cyclists and bridleways equestrian paths The need for these guidelines comes from the fact that structural engineers designing footbridges currently have to spend considerable time and energy collecting information from numerous documents codes and recommendations to make design decisions There seems to be no international document dedicated solely to the design of footbridges These

guidelines attempt to provide a concentrated source of information regarding all design issues specific to footbridges. It is meant to be a liberal document in the sense that it promotes new innovative and bold yet prudent designs by sharing the experience of the authors summarizing specifications given in codes and presenting a collection of examples of well designed structures or structural details from around the world. It is not intended to be an international code that specifies limits and admissible values thus encouraging timid conservative designs that are repetitions of approved and tested designs. Indeed it may be the very fact that no international code exists specifically for footbridges that encourages the wide variety of footbridge designs found today. It should be noted that numerous guidelines codes and books have been published on bridge design in general. Information given in those publications that is also applicable to footbridges is not repeated in Bulletin 32. The chapters of these guidelines all follow the same pattern: an introduction to the subject, general guidelines as well as do's and don'ts, a summary of information found in existing international codes, recommendations, experience of the authors and built examples with comparison and comments on this information, examples. Plenty of illustrations and photographs help to visualize the themes of this work. The last chapter, Case Studies, contains footbridges each with a short summary of main structural data and references for further reading.

Educational Administration and History Tanya Fitzgerald, Helen Gunter, 2013-10-18

In the past 40 years there have been a number of significant developments across the fields of educational administration and history. In this volume the authors have selected a number of key issues to illustrate and trace these changes. The seven articles by leading scholars in the field offer an analysis of contemporary educational administration history and policy debates and how this has impacted on teachers, leaders, schools and the education sector. This book offers readers a valuable insight into continuing and contemporary debates in the field and the authors offer a refreshing interpretation of these debates. This book provides a rich analysis from a range of theoretical, methodological perspectives and highlights the extent to which these debates remain a contemporary concern. This book was published as a special issue of the *Journal of Educational Administration and History*.
