**Digital Video** Floriano De Rango,2010-02-01 This book tries to address different aspects and issues related to video and multimedia distribution over the heterogeneous environment considering broadband satellite networks and general wireless systems where wireless communications and conditions can pose serious problems to the efficient and reliable delivery of content Specific chapters of the book relate to different research topics covering the architectural aspects of the most famous DVB standard DVB T DVB S S2 DVB H etc the protocol aspects and the transmission techniques making use of MIMO hierarchical modulation and lossy compression In addition research issues related to the application layer and to the content semantic organization and research on the web have also been addressed in order to give a complete view of the problems The network technologies used in the book are mainly broadband wireless and satellite networks The book can be read by intermediate students researchers engineers or people with some knowledge or specialization in network topics     **Axmedis**

**2008** Jaime Delgado,Paolo Nesi,2008 The present book covers topics both on fluvial and lagoon morphodynamics The first

part is dedicated to tidal environments Topics include an overview of main morphological features and mechanisms of estuaries and tidal channels and a model devoted to investigate flow field pattern and bed topography in tidal meandering channels and a comparison with recent observational evidence of meanders within different tidal environments The general failure of Bagnold hypothesis when applied to equilibrium bedload transport at even relatively modest transverse slope is demonstrated A new model is then proposed based on an empirical entrainment formulation of bed grains

 specialized and fr mented it is easy to lose sight that many topics in FGIT have common threads and because of this advances  
 in one discipline may be transmitted to others Presentation of recent results obtained in different disciplines encourages this  
 interchange for the advancement of FGIT as a whole Of particular interest are hybrid solutions that c bine ideas taken from  
 multiple disciplines in order to achieve something more signi cant than the sum of the individual parts Through such hybrid  
 philosophy a new principle can be discovered which has the propensity to propagate throughout mul faceted disciplines FGIT  
 2009 was the first mega conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple
