Automobile Automation Victoria A. Banks,Neville A. Stanton,2017-08-04 Increasing levels of driving automation has changed the role of the driver from active operator to passive monitor However Systems Design has been plagued by criticism for failing to acknowledge the new role of the driver within the system network To understand the driver s new role within an automated driving system the theory of Distributed Cognition is adopted This approach provides a useful framework for the investigation of allocation of function between multiple agents in the driving system A Systems Design Framework has been developed that outlines how the Distributed Cognition paradigm can be applied to driving using both qualitative and quantitative research methodologies
