Nice Book Apes View Human Evolution:

An Ape's View of Human Evolution Peter Andrews, 2016-01-07 Our closest living relatives are the chimpanzee and bonobo. We share many characteristics with them but our lineages diverged millions of years ago. Who in fact was our last common ancestor? Bringing together ecology, evolution, genetics, anatomy, and geology, this book provides a new perspective on human evolution. What can fossil apes tell us about the origins of human evolution? Did the last common ancestor of apes and humans live in trees or on the ground? What did it eat and how did it survive in a world full of large predators? Did it look anything like living apes? Andrews addresses these questions and more to reconstruct the common ancestor and its habitat. Synthesising thirty-five years of work on both ancient environments and fossil and modern ape anatomy, this book provides unique new insights into the evolutionary processes that led to the origins of the human lineage. *On Human Nature*

Jonathan H. Turner, 2020-11-24 In this book Jonathan H. Turner combines sociology, evolutionary biology, cladistic analysis from biology, and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present-day great apes. Selection pressures altered this inherited legacy for the ancestors of humans termed hominins for being bipedal and forced greater organization than extant great apes when the hominins moved into open country terrestrial habitats. The effects of these selection pressures increased hominin ancestors' emotional capacities through greater social and group orientation. This shift in turn enabled further selection for a larger brain, articulated speech, and culture along the human line. Turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain, speech, and culture. These complexes he shows can be understood as the cognitive complex, the psychological complex, the emotions complex, the interaction complex, and the community complex. **Human Evolution**

Roger Lewin, 2009-02-18 The brief length and focused coverage of *Human Evolution: An Illustrated Introduction* have made this best-selling textbook the ideal complement to any biology or anthropology course in which human evolution is taught. The text places human evolution in the context of humans as animals while also showing the physical context of human evolution, including climate change and the impact of extinctions. Chapter introductions, numerous drawings and photographs, and an essential glossary all add to the accessibility of this text. The fifth edition has been thoroughly updated to include coverage of the latest discoveries and perspectives, including new early hominid fossils from Africa and Georgia and their implications, new archaeological evidence from Africa on the origin of modern humans, updated coverage of prehistoric art including new sites, new perspectives on molecular evidence and their implications for human population history. An instructor manual, CD-ROM for this title is available. Please contact our Higher Education team at HigherEducation@wiley.com for more information. *The Human Story* Charles Lockwood, 2008 Anthropology professor Charles Lockwood tells the amazing story of human evolution in a concise and compelling introduction to all our ancestors and extinct relatives. He draws on the explosion of discoveries made over the

past 20 years to demystify the fascinating cast of characters who hold the secret to our origins and describes the main sites individual fossils key scientific breakthroughs and latest research that have fed our knowledge With the help of a rich assortment of photographs reconstructions and maps Lockwood takes us from the earliest hominins who date back six or seven million years ago to contemporary homo sapiens providing the basic facts about each species what it looked like what it ate how and when it lives and how we know this information Created in association with London s Natural History Museum this is a truly readable up to date well illustrated and user friendly summary of the evidence as it stands today **Eugène Dubois and the Ape-Man from Java** L.T. Theunissen,2012-12-06 Although the name Pithecanthropus is now seldom used there are few who study the origin of our species who will fail to recognise the historical place of the usage and its association with Eugene Dubois During the last thirty or forty years Australopithecus and its African context has tended to draw attention from the early work on our origins in Java It is now increasingly common to hear the term pithecanthropine used only to indicate the Asian or Far Eastern examples of Homo erectus which although probably derived from African ancestry have some features that in the opinion of some experts may justify their being considered distinctive This discussion is not within the pages that follow which deal extensively with the work of Eugene Dubois He was an extraordinary man who did as much as any person since to put the great antiquity of our ancestors firmly in the public domain Dubois became involved with the study of human origins from a medical and anatomical background as have many since The jealousies and professional pressures that we think of as a phenomenon of the post war years were clearly a major factor in deciding the future of his career **Encyclopedia of Global Justice** Deen K. Chatterjee,2011-10-06 This two volume Encyclopedia of Global Justice published by Springer along with Springer s book series Studies in Global Justice is a major publication venture toward a comprehensive coverage of this timely topic The Encyclopedia is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The Encyclopedia sets the tone and direction of this increasingly important area of scholarship for years to come The entries number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas **Illuminating Human Evolution: 150 Years after Darwin** Jaume Bertranpetit,Juli Peretó,2022-10-06 This book presents a series of perspectives showing the current knowledge about human evolution On the occasion of the 150th anniversary of Darwin s book The Descent of Man and Selection in Relation to Sex in which he explicitly addresses the natural origin of the human species this collective work reviews current and diverse aspects of human evolution from psychology linguistics genomics paleontology artistic expression or sexual selection It also offers a historical social and ideological context of what is often considered to be Darwin s second great work after The Origin of Species Although

current research is concentrated largely on fossils and genomes this book also deals with the main points Darwin centered his attention on comparative morphology and psychology and sexual selection It also covers other new aspects such as the origin of art social structure and social learning With contributions from leading experts in their respective fields the book guides readers to the study of the social context of Darwin and his time and the state of the art of studies on human evolution and sexual selection considering all aspects that Darwin examined including those that emerged later and now are important disciplines in our understanding of our own evolution The English translation of parts of this book from its Spanish original manuscript was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content

Ancestors and Relatives Eviatar Zerubavel,2011-11-04 Eviatar Zerubavel casts a critical eye on how we trace our past individually and collectively arguing that rather than simply find out who our ancestors are from genetics or history we actually create the stories that make them our ancestors

George Gaylord Simpson Léo F. Laporte,2000-09-26 In 1978 the distinguished paleontologist George Gaylord Simpson published his autobiography Concession to the Improbable which gave the basic facts of his life but left more questions than it answered Now L o F Laporte presents this absorbing intellectual study of Simpson s major areas of work Focusing on Simpson s scientific contributions Laporte provides chapters on Simpson s earliest paleontological research through his distinguished Alexander Agassiz professorship at Harvard and his extensive fieldwork for the American Museum of Natural History where he developed the core themes set forth in his most prestigious work Tempo and Mode in Evolution Columbia University Press 1944 Simpson was arguably the first evolutionary paleontologist to combine descriptive taxonomy with the modern approaches of genetics and statistical analysis Despite his brilliance Simpson was a difficult person to know Laporte addresses the nature of Simpson s interpersonal problems with colleagues during his life An introductory overview provides the biographical context of Simpson s career and provides the framework for his major paleontological and evolutionary contributions

Understanding Human Evolution Jeffrey K. McKee,2015-10-16 For the one term course in human evolution paleoanthropology or fossil hominins taught at the junior senior level in departments of anthropology or biology This new edition provides a comprehensive overview to the field of paleoanthropology the study of human evolution by analyzing fossil remains It includes the latest fossil finds attempts to place humans into the context of geological and biological change on the planet and presents current controversies in an even handed manner

Encyclopedia of Evolution Stanley A. Rice,2009 Evolutionary science is not only one of the greatest breakthroughs of modern science but also one of the most controversial Perhaps more than any other scientific area evolutionary science has caused us all to question what we are where we came from and how we relate to the rest of the universe Encyclopedia of Evolution contains more than 200 entries that span modern evolutionary science and the history of

its development This comprehensive volume clarifies many common misconceptions about evolution For example many people have grown up being told that the fossil record does not demonstrate an evolutionary pattern and that there are many missing links In fact most of these missing links have been found and their modern representatives are often still alive today The biographical entries represent evolutionary scientists within the United States who have had and continue to have a major impact on the broad outline of evolutionary science The biographies chosen reflect the viewpoints of scientists working within the United States Five essays that explore interesting questions resulting from studies in evolutionary science are included as well The appendix consists of a summary of Charles Darwin s Origin of Species which is widely considered to be the foundational work of evolutionary science and one of the most important books in human history The five essays include How much do genes control human behavior What are the ghosts of evolution Can an evolutionary scientist be religious Why do humans die Are humans alone in the universe

Evolving Health Noel T. Boaz, 2002-10-01 Human illnesses can be understood as damage to those adaptations that we took on at various stages in our evolution from pre life molecules to modern Homo sapiens Preventing these illnesses entails avoiding what causes the damage which too frequently are the everyday hazards of twenty first century life as the chart below shows

Level of Evolution	Cause of adaptive failure resulting disease or problem
Pre life	Environmental poisons
Certain birth defects	Single cell bacteria and amoeba like
Viral infection	Colds flu HIV
Morula sponge like	Cellular stress
Cancer	Chordate
Physical stress	Back pain
Fish	Excess dietary salt
Hypertension heart disease	Amphibian
Tobacco smoke	Lung cancer emphysema
Lower primate	Excess dietary sugar
Diabetes mellitus	Higher primate
Vitamin C deficiency	Scurvy
Ape	Excess dietary protein
Gout	Homo sapiens
Reduced dietary variety	Nutritional diseases food allergies

Debating Humankind's Place in Nature, 1860-2000 Richard G. Delisle, 2015-07-14 This text the only one of its kind on the market surveys the development of the field of human evolution from its inception through today It provides students with a broad contrast enabling them to fully understand the value and role of current paleoanthropological research Features An historical approach Establishes for students the nature of paleoanthropology through the historical development of the field from 1860 through 2000 and shows students that paleoanthropology is a remarkably progressive field A focus on the debates in the field of human evolution especially the phylogenetic or genealogical debates Analyzes four distinct debates presented separately from their inception to the present

- 1 Humankind s place among the primates
- 2 The place of the australopithecines relative to the human line
- 3 Debates on human phylogeny proper
- 4 Proposed scenarios of hominization

The Top Books of the Year Nice Book Apes View Human Evolution The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. Nice Book Apes View Human Evolution : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Nice Book Apes View Human Evolution : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
