Conceptual Modeling - ER 2001 Hideko S. Kunii, Sushil Jajodia, Arne Sølvberg, 2001 *Handbook of Conceptual Modeling* David W. Embley, Bernhard Thalheim, 2012-04-23 Conceptual modeling is about describing the semantics of software applications at a high level of abstraction in terms of structure behavior and user interaction Embley and Thalheim start with a manifesto stating that the dream of developing information systems strictly by conceptual modeling as expressed in the phrase the model is the code is becoming reality The subsequent contributions written by leading researchers in the field support the manifesto's assertions showing not only how to abstractly model complex information systems but also how to formalize abstract specifications in ways that let developers complete programming tasks within the conceptual model itself They are grouped into sections on programming with conceptual models structure modeling process modeling user interface modeling and special challenge areas such as conceptual geometric modeling information integration and biological conceptual modeling The Handbook of Conceptual Modeling collects in a single volume many of the best conceptual modeling ideas techniques and practices as well as the challenges that drive research in the field Thus it is much more than a traditional handbook for advanced professionals as it also provides both a firm foundation for the field of conceptual modeling and points researchers and graduate students towards interesting challenges and paths for how to contribute to this fundamental field of computer science **Conceptual Modeling - ER 2000** International Conference on Conceptual Modeling, 2000 *Conceptual Modeling - ER 2002* Stefano Spaccapietra, Salvatore March, Yahiko Kambayashi, 2002 *HCI International 2020 - Late Breaking Papers: Cognition, Learning and Games* Constantine Stephanidis, Don Harris, Wen-Chin Li, Dylan D. Schmorrow, Cali M. Fidopiastis, Panayiotis Zaphiris, Andri Ioannou, Xiaowen Fang, Robert A. Sottilare, Jessica Schwarz, 2020-10-03 This book constitutes late breaking papers from the 22nd International Conference on Human Computer Interaction HCII 2020 which was held in July 2020 The conference was planned to take place in Copenhagen Denmark but had to change to a virtual conference mode due to the COVID 19 pandemic From a total of 6326 submissions a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place In addition a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work papers and posters These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems **Novel Developments in Granular Computing: Applications for Advanced Human Reasoning and Soft Computation** Yao, JingTao, 2010-06-30 This book investigates granular computing GrC which emerged as one of the fastest growing information processing paradigms in computational intelligence and human centric systems Provided by publisher *Knowledge-based Intelligent Information Engineering Systems & Allied Technologies* Norio Baba, L. C. Jain, Robert J. Howlett, 2001 The annual Kes International Conference in Knowledge based Intelligent Information Engineering Systems and Allied Technologies has become an event

that is held in high regard by the intelligent systems community The proceedings of the fifth conference represents a comprehensive survey of research on the theory and application of knowledge based intelligent systems including topics such as generic intelligent techniques artificial neural networks machine learning fuzzy and neuro fuzzy techniques and artificial life applications of intelligent systems condition monitoring fault diagnosis image processing and high voltage systems and allied technologies communications the Internet and web based technologies e commerce and computer pets The proceedings should be of interest to those in the intelligent systems field such as engineers researchers and students

Frameworks for Developing Efficient Information Systems: Models, Theory, and Practice Krogstie, John, 2013-06-30 As advances in technology continue to generate the collective knowledge of an organization and its operations strategic models for information systems are developed in order to arrange business processes and business data Frameworks for Developing Efficient Information Systems Models Theory and Practice presents research and practices on the advancements in systems analysis and design These theoretical frameworks and practical solutions are useful for researchers practitioners and academicians as this book aims to bridge the communication gap between business managers and system designers

Handbook on Ontologies Steffen Staab, Rudi Studer, 2013-04-17 An ontology is a description like a formal specification of a program of concepts and relationships that can exist for an agent or a community of agents The concept is important for the purpose of enabling knowledge sharing and reuse The Handbook on Ontologies provides a comprehensive overview of the current status and future prospectives of the field of ontologies The handbook demonstrates standards that have been created recently it surveys methods that have been developed and it shows how to bring both into practice of ontology infrastructures and applications that are the best of their kind

Information Modelling and Knowledge Bases XXVIII H. Jaakkola, B. Thalheim, Y. Kiyoki, 2017-01-03 Information modelling and knowledge bases are now essential not only to academics working in computer science but also wherever information technology is applied This book presents papers from the 26th International Conference on Information Modelling and Knowledge Bases formerly the European Japanese Conference EJC which took place in Tampere Finland in June 2016 The conference provides a platform to bring together researchers and practitioners working with information modelling and knowledge bases and the 33 accepted papers cover topics including conceptual modelling knowledge and information modelling and discovery linguistic modelling cross cultural communication and social computing environmental modelling and engineering and multimedia data modelling and systems All papers were improved and resubmitted for publication after the conference Covering state of the art research and practice the book will be of interest to all those whose work involves information modelling and knowledge bases

Harvesting and Managing Knowledge in Construction Yacine Rezgui, John Miles, 2011-02-23 A successful construction business is a knowledge business And knowledge must be managed effectively to be used efficiently especially in a complex project oriented business such as construction where skills acquired and lessons learned on one project need to

be applied to the next A holistic approach to knowledge management KM is taken in this book to incorporate all of the relevant themes tackling technological socio cultural and organizational issues with the creation of value as a focus throughout Information is drawn from a broad range of sources to explain core theories and provide guidance on practical application Topics covered include changing business relationships in a knowledge economy knowledge creation processes and theories data text and knowledge mining techniques the learning construction organization future technology for knowledge management Written by the authors of the first EU funded KM research project in the field of construction this textbook is uniquely well researched and is the perfect introduction to KM for students across the built environment It is also a crucial guide to the topic for practitioners

Theoretical and Practical Advances in Information Systems Development: Emerging Trends and Approaches Siau, Keng, 2011-04-30 Information system design and development is of interest and importance to researchers and practitioners as advances in this discipline impact a number of other related fields and help to guide future research Theoretical and Practical Advances in Information Systems Development Emerging Trends and Approaches contains fundamental concepts emerging theories and practical applications in database management systems analysis and design and software engineering Contributions present critical findings in information resources management that inform and advance the field

Agent-Oriented Information Systems 2001, 2001-06-05 Architecting the Internet of Things Dieter Uckelmann, Mark Harrison, Florian Michahelles, 2011-04-02 Many of the initial developments towards the Internet of Things have focused on the combination of Auto ID and networked infrastructures in business to business logistics and product lifecycle applications However the Internet of Things is more than a business tool for managing business processes more efficiently and more effectively it will also enable a more convenient way of life Since the term Internet of Things first came to attention when the Auto ID Center launched their initial vision for the EPC network for automatically identifying and tracing the flow of goods within supply chains increasing numbers of researchers and practitioners have further developed this vision The authors in this book provide a research perspective on current and future developments in the Internet of Things The different chapters cover a broad range of topics from system design aspects and core architectural approaches to end user participation business perspectives and applications

Enterprise Information Systems II B. Sharp, Joaquim Filipe, José Cordeiro, 2013-11-11 This book comprises the refereed papers together with the invited keynote papers presented at the Second International Conference on Enterprise Information Systems The conference was organised by the School of Computing at Staffordshire University UK and the Escola Superior de Tecnologia de Setúbal Portugal in cooperation with the British Computer Society and the International Federation for Information Processing Working Group 8.1 The purpose of this 2nd International Conference was to bring together researchers engineers and practitioners interested in the advances in and business applications of information systems The papers demonstrate the vitality and vibrancy of the field of Enterprise Information Systems The research papers included

here were selected from among 143 submissions from 32 countries in the following four areas Enterprise Database Applications Artificial Intelligence Applications and Decision Support Systems Systems Analysis and Specification and Internet and Electronic Commerce Every paper had at least two reviewers drawn from 10 countries The papers included in this book were recommended by the reviewers On behalf of the conference organising committee we would like to thank all the members of the Programme Committee for their work in reviewing and selecting the papers that appear in this volume We would also like to thank all the authors who have submitted their papers to this conference and would like to apologise to the authors that we were unable to include and wish them success next year

Artificial Intelligence in the Pacific Rim

Hozumi Tanaka,1991 In the last decade AI firmly settled into our industrial society with the expert systems as the representative product However almost every one of the systems could cover only a single task domain In the highly mechanized world of the 21st century systems will become smart and user friendly enough to cover a wide range of task domains Systems with much user friendliness must be multilingual because users in different domains usually have different languages Language is formed in its own culture Therefore promotion for cross cultural scientific interchange will be indispensable for the progress of AI

Handbook of Research on Innovative Database Query Processing Techniques Yan, Li,2015-09-25 Research and development surrounding the use of data queries is receiving increased attention from computer scientists and data specialists alike Through the use of query technology large volumes of data in databases can be retrieved and information systems built based on databases can support problem solving and decision making across industries The Handbook of Research on Innovative Database Query Processing Techniques focuses on the growing topic of database query processing methods technologies and applications Aimed at providing an all inclusive reference source of technologies and practices in advanced database query systems this book investigates various techniques including database and XML queries spatiotemporal data queries big data queries metadata queries and applications of database query systems This comprehensive handbook is a necessary resource for students IT professionals data analysts and academicians interested in uncovering the latest methods for using queries as a means to extract information from databases This all inclusive handbook includes the latest research on topics pertaining to information retrieval data extraction data management design and development of database queries and database and XM queries

The Essence of Software Daniel Jackson,2023-06-20 A revolutionary concept based approach to thinking about designing and interacting with software As our dependence on technology increases the design of software matters more than ever before Why then is so much software flawed Why hasn't there been a systematic and scalable way to create software that is easy to use robust and secure Examining these issues in depth The Essence of Software introduces a theory of software design that gives new answers to old questions Daniel Jackson explains that a software system should be viewed as a collection of interacting concepts breaking the functionality into manageable parts and providing a new

framework for thinking about design Through this radical and original perspective Jackson lays out a practical and coherent path accessible to anyone from strategist and marketer to UX designer architect or programmer for making software that is empowering dependable and a delight to use Jackson explores every aspect of concepts what they are and aren't how to identify them how to define them and more and offers prescriptive principles and practical tips that can be applied cost effectively in a wide range of domains He applies these ideas to contemporary software designs drawing examples from leading software manufacturers such as Adobe Apple Dropbox Facebook Google Microsoft Twitter and others Jackson shows how concepts let designers preserve and reuse design knowledge rather than starting from scratch in every project An argument against the status quo and a guide to improvement for both working designers and novices to the field *The Essence of Software* brings a fresh approach to software and its creation

Handbook of Semantic Web Technologies John Domingue, Dieter Fensel, James A. Hendler, 2011-06-19 After years of mostly theoretical research Semantic Web Technologies are now reaching out into application areas like bioinformatics eCommerce eGovernment or Social Webs Applications like genomic ontologies semantic web services automated catalogue alignment ontology matching or blogs and social networks are constantly increasing often driven or at least backed up by companies like Google Amazon YouTube Facebook LinkedIn and others The need to leverage the potential of combining information in a meaningful way in order to be able to benefit from the Web will create further demand for and interest in Semantic Web research This movement based on the growing maturity of related research results necessitates a reliable reference source from which beginners to the field can draw a first basic knowledge of the main underlying technologies as well as state of the art application areas This handbook put together by three leading authorities in the field and supported by an advisory board of highly reputed researchers fulfils exactly this need It is the first dedicated reference work in this field collecting contributions about both the technical foundations of the Semantic Web as well as their main usage in other scientific fields like life sciences engineering business or education
