Nice Book Corporations Sustainability South Asian Perspective:

Corporations and Sustainability Jose P D, 2017 *Corporations and Sustainability The South Asian Perspective* is a collection of contributions from leading academics and practitioners which provides an overview of the key challenges and opportunities related to sustainability in South Asia. The last two decades have seen rapid and often dramatic changes in the institutional economic and ecological contexts in which firms operating in South Asian economies find themselves. South Asia is increasingly seen both as a driver of global economic growth as well as a barrier to sustainable development. The most significant driver of change in the region has been the economic liberalization attempts of national governments resulting in easier and faster flows of information, labour and capital between these economies and the rest of the world. Consequently, global environmental and social concerns are increasingly driving governmental and corporate decision making processes for firms operating in South Asia. In responding to these emerging challenges, firms have begun to re-evaluate and redesign their strategies, structures and processes as well as incorporate sustainability principles into their strategies. *Corporations and Sustainability The South Asian Perspective* thus delivers an important perspective for researchers as well as students of master's level courses on business and environment. It is particularly useful for those trying to understand the key sustainability challenges in the South Asian context as well as some of the solutions emerging in the critical areas of heavy industry and also service sectors. The historical trends and coactive processes that underpinned those human cooperative arrangements which fostered growth and general well being require comparative focus if we are to draw on the wealth of human history to help craft better governance in the future and forestall the tripwires that lead to its failures We welcome contributions which focus on Diachronic examinations of changes in the fiscal foundations of governance and their impacts on governance Comparative analysis of governmental variability and its relationship to collective action and its fiscal financing Cross temporal studies of shifts in the degree of good governance and relations to inequality sustainability bureaucracy public goods and services and fiscal financing The importance of social compacts and contracts in representative government and how these are sustained and break down Alternatives and supplements to elections as means of assessing subaltern voices The relationship between governance and inequality over time and across space Differences in modes of political collapse and their relationship to governance fiscal financing and responses of principals The role of public ritual in good versus autocratic governments Variance in communication and computation in good versus autocratic governments The relationship between comparative governance and the uses and spatial distributions of community urban space residential and non residential architecture sprawl versus compact settlement The relationship between comparative governance and neighborhood organization Was there one or many episodes of enlightenment The relationship between governance and coactive processes including considerations of demographic growth patterns of migration well being economic growth The relationship between slave labor and governance spot resources and governance Non hierarchical and egalitarian forms of governance in non state societies Indigenous inspirations and influences on the Constitution of the United States Collective action and establishment of early cities Our aim for this Research Topic is to compile a series of research essays drawn from a broad cross regional and cross temporal sample of historical settings to explore issues and themes relevant to the history and processes that have been at the heart of good governance
