Passive Solar Buildings J. Douglas Balcomb, 1992 Describes developments in passive solar technology that will save time energy and resources in planning for the buildings of the future This companion to Passive Cooling and Solar Building Architecture volumes 8 and 9 describes developments in passive solar technology that will save time energy and resources in planning for the buildings of the future It is filled with tips and useful research for architects and designers and includes three substantial chapters on general modeling Passive solar heating works Properly designed and constructed it is cost effective practical comfortable and aesthetic Balcomb s introductory remarks set the tone for the rest of the contributions which describe the considerable record of achievements in passive solar heating Balcomb summarizes and evaluates the era between 1976 and 1983 when most of the major developments took place and highlights the design features that have contributed to effective buildings Three chapters cover modeling passive systems applicable to both heating and cooling and six chapters focus on the application of passive solar heating with emphasis on components analytical results for specific systems test modules subsystem integration into buildings performance monitoring and results and design tools J Douglas Balcomb is a Principal Engineer with the Solar Energy Research Institute **Solar Heat Technologies: Passive solar buildings** ,1988 Passive Solar Buildings ,1992 **Solar Thermal Technologies for Buildings** M.

Santamouris, 2014-04-23 Solar thermal is now a proven technology in terms of reliability cost benefit and low environmental impact The integration of solar thermal systems and installations into the design of buildings can provide a clean efficient and sustainable low energy solution for heating and cooling whilst taken in a wider context contributing to climate protection This book covers the state of the art in the application of solar thermal technologies for buildings This is the first book in the BEST Buildings Energy and Solar Technology Series This series presents high quality theoretical and application oriented material on solar energy and energy efficient technologies Leading international experts cover the strategies and technologies that form the basis of high performance sustainable buildings crucial to enhancing our built and urban environment **Solar Technologies for Buildings** Ursula Eicker, 2006-08-14 A complete overview of solar technologies relevant to the built environment including solar thermal energy for heating and cooling passive solar energy for daylighting and heating supply and photovoltaics for electricity production Provides practical examples and calculations to enable component and system simulation e g Calculation of U values I V curve parameters and radiance distribution modelling Discusses the new trends in thermal energy use including the architectural integration of collector systems integrated ventilation photovoltaics facades and solar powered absorption cooling systems Coverage of cutting edge applications such as active and passive cooling techniques and results from ongoing research projects History and Overview of Solar Heat Technologies Donald A. Beattie, 1997 This final volume in a series that has surveyed advances in solar energy research since the oil shock of the early 1970s provides a broad overview of the U S solar thermal program It summarizes the conclusions of

each of the nine technical volumes in the series and offers lessons drawn from the program for future governmental efforts to foster specific technologies Reading this history it becomes clear that what was unique about the federal solar program was its attempt to create research guidelines that included commercialization as part of the expected outcome The three contributors all active participants in the solar project are quite candid about what worked and what did not and why The result is a tale of bureaucracy and politics worth pondering as we debate the proper relationship between government and science
