Vision For The World: Eye Surgeons' Solution To Mass Blindness – A Major World Medical Problem Arthur S M Lim, 1996-06-01 The problem of mass blindness today stems largely from cataract which accounts for a total of 40 million cataract victims in the world and it will worsen with the ageing population Fortunately this problem can be resolved with cost effective extracapsular cataract extraction ECCE and posterior chamber implantation PCI This book highlights how the use of ECCE and PCI can restore normal vision to cataract victims around the world A successful approach is to establish training centres The success of the International Intraocular Implant Training Centre IIITC in the Peoples Republic of China is cited to show that implant surgery for cataracts can be successfully performed in communities in developing nations in Asia with appropriate training and supervision The centre has since

yielded excellent results with cost effective ECCE and PCI The book challenges eye surgeons around the world to unite to address a global need to contain world cataract blindness Monthly Catalog of United States Government Publications, Cumulative Index United States. Superintendent of Documents,1979 **Latent Curve Models** Kenneth A. Bollen,Patrick J. Curran,2006-01-03 An effective technique for data analysis in the social sciences The recent explosion in longitudinal data in the social sciences highlights the need for this timely publication Latent Curve Models A Structural Equation Perspective provides an effective technique to analyze latent curve models LCMs This type of data features random intercepts and slopes that permit each case in a sample to have a different trajectory over time Furthermore researchers can include variables to predict the parameters governing these trajectories The authors synthesize a vast amount of research and findings and at the same time provide original results The book analyzes LCMs from the perspective of structural equation models SEMs with latent variables While the authors discuss simple regression based procedures that are useful in the early stages of LCMs most of the presentation uses SEMs as a driving tool This cutting edge work includes some of the authors recent work on the autoregressive latent trajectory model suggests new models for method factors in multiple indicators discusses repeated latent variable models and establishes the identification of a variety of LCMs This text has been thoroughly class tested and makes extensive use of pedagogical tools to aid readers in mastering and applying LCMs quickly and easily to their own data sets Key features include Chapter introductions and summaries that provide a quick overview of highlights Empirical examples provided throughout that allow readers to test their newly found knowledge and discover practical applications Conclusions at the end of each chapter that stress the essential points that readers need to understand for advancement to more sophisticated topics Extensive footnoting that points the way to the primary literature for more information on particular topics With its emphasis on modeling and the use of numerous examples this is an excellent book for graduate courses in latent trajectory models as well as a supplemental text for courses in structural modeling This book is an excellent aid and reference for researchers in quantitative social and behavioral sciences who need to analyze longitudinal data
