Larsson, 2016-12-30 The role of social capital in regional development is a multifaceted topic which is studied all over the world using various methods and across numerous disciplines It has long been evident that social capital is important for regional development however it is less clear how this works in practice Do all types of social capital have the same effects and are different kinds of regions impacted in the same way This book is the first to offer an overview of this rapidly expanding field of research and to thoroughly analyse the complex issue of social capital and regional development **Entrepreneurship as Networking** Tom Elfring, Kim Klyver, Elco van Burg, 2021-05-11 Tom Elfring Kim Klyver and Elco van Burg propose a new perspective on entrepreneurship and demonstrate how networking is the core of entrepreneurial action Showing that your networking behavior is equally important to who you already know this book addresses the importance of networking for business venturing **Practising Without Belonging?** Tobias Köllner, 2012 This is an examination of the intersection of Russia s economic transformation and religious revival in the sphere of morality **Class, Ethnicity, Gender and Latino Entrepreneurship** María Eugenia Verdaguer, 2009-02 Verdaguer examines first generation Latino entrepreneurs revealing not only that Latinos strategies for access to business ownership and development are cut across class ethnic and gender lines but also that immigrants options and practices remain shaped by patriarchal gender relations within the immigrant family community and economy

Supporting University Ventures in Nanotechnology, Biomaterials and Magnetic Sensing Applications Julian Peña

Dopazo, Fatima Zivic, 2017-07-21 This book investigates the transfer of technology from basic research to society. When transferring technology, two main ways may arise: licensing out the further exploitation rights straight from the University departments to the industry or joining the technology a step beyond into market applications for products and services development through spin off and startup companies. This book focuses on the second process and the stakeholders involved with several study cases from real life. Profiles of research entrepreneurs are described along with categories and general characteristics of entrepreneurial infrastructure. Different phases of launching university ventures are presented as well as currently perceived technology transfer systems. Important practical considerations for IP protection are included. Case studies of research transfer are shortly given related to nanotechnology, biomaterials and magnetic sensing applications. The book was written by experts in the field with extensive practical experience in both academic and entrepreneurship real life cases, thus being able to uniquely integrate both approaches to spin offs and startups. The Anatomy of Entrepreneurial Decisions Andrea Caputo, Massimiliano M. Pellegrini, 2019-08-02 The creation, success and long term survival of enterprises are fundamentally linked to the effectiveness of decision making processes and negotiation capabilities. This book provides an overview of research into how decisions permeate entrepreneurial ventures throughout their lifecycle. A multidisciplinary approach combining psychology, sociology and political science is used to investigate how entrepreneurs address and deal with decision making. The respective contributions highlight the latest empirical, theoretical and meta research and bridge the gap between literature on entrepreneurship, entrepreneurial and innovative behaviours with that on decision making and negotiation. This book is one of the first to combine these streams of research, thereby offering a new and insightful addition to the field of entrepreneurship. *Cooperation, Clusters, and Knowledge Transfer* Joao J M Ferreira, Mário Raposo, Roel Rutten, Attila Varga, 2013-03-26 Cooperation and clusters have become the guiding paradigms for explaining and promoting regional competitiveness, but the cooperation process between firms and universities and the transfer of knowledge in guiding and nurturing regional competitiveness has received relatively little attention. This book strives to fill this gap in highlighting the connection between inter firm cooperation in regional clusters, innovation and regional networks and the role of universities in them. It goes beyond the traditional economic approach of clusters and includes soft factors in the explanation of regional competitiveness and connects the literature on clusters to the literature of learning and knowledge creation as sources of regional competitiveness. It aims to foster an international and interdisciplinary exchange of perspectives by presenting current developments, case studies, best practices as well as new integrated theoretical approaches and applications.
