Disobedient Aesthetics Anthony Stagliano, 2024-03-22 Disobedient Aesthetics examines emergent forms of creative civil disobedience that have arisen in response to digital tools of surveillance and control Analyzing activities that defy by hacking subverting or otherwise thwarting efforts to use the interface of our bodies and networked technologies Disobedient Aesthetics theorizes the rhetorical and aesthetic character of such disobedient acts and the possibilities limitations and risks they pose for democratic participation In recent decades new tools of surveillance and control have become ubiquitous among them security cameras data mining in social media spaces and biometric scanning As such we all now dwell in spaces of public everyday life that entangle networked levers of control with the facticity of having bodies DNA or even faces in public Each chapter probes a different aspect of our embodied experience as sites of data exploitation The first chapter examines tactical interventions into the thermal vision systems used on military drones Human body heat itself is transformed into a media object and a source of data for lethal drone systems In the following chapter we encounter extraordinarily sophisticated facial recognition platforms that are turning our very faces into actionable data mines The next chapter examines two kinds of on demand DNA analysis at home testing like that used by 23andMe and a related police

practice to show what's at stake when the hunger for personal data dives all the way into our genetic makeup. The next chapter considers how surveillance and control has come to change urban governance and with it the physical space of publicness itself. Data-driven governance paired with home sharing platforms like AirBNB apply even more pressure on populations and have engendered new predictive forms of policing and new architectural forms such as anti-homeless spikes in public spaces. The final chapter examines several different creative critical and collective efforts to democratize access to the technical knowledge needed to intervene in the control systems addressed in the prior chapters. A concluding epilogue revisits current theories and manifestations of control and offers an alternative reading of Gilles Deleuze's oft-cited thesis on control societies: namely that with control it is not a matter of escaping it but a matter of finding new weapons to undermine its functions. All of the projects and activities surveyed here do indeed attempt that, but the epilogue meditates on an alternative to finding new weapons in the search for new tactics. Ultimately, Disobedient Aesthetics theorizes control and the possibilities of creative disobedient intervention into it as at once an aesthetic and rhetorical phenomenon with the creative disruptions of control surveyed here standing as potent models for productive paths for democratizing technology now.

The Good Drone Austin Choi-Fitzpatrick, 2020-07-28 How small-scale drones, satellites, kites, and balloons are used by social movements for the greater good. Drones are famous for doing bad things; weaponized, they implement remote control war, used for surveillance, they threaten civil liberties and violate privacy. In *The Good Drone*, Austin Choi-Fitzpatrick examines a different range of uses: the deployment of drones for the greater good. Choi-Fitzpatrick analyzes the way small-scale drones, as well as satellites, kites, and balloons, are used for a great many things, including documenting human rights abuses, estimating demonstration crowd size, supporting anti-poaching advocacy, and advancing climate change research. In fact, he finds small drones are used disproportionately for good; nonviolent prosocial uses predominate. *Resources in Education*, 1997

How to Avoid Being Killed in a War Zone Rosie Garthwaite, 2011-06-21 Whether you're a war correspondent or an aid worker, a tourist worried about an increasingly hostile world, or an armchair traveler concerned that your own backyard is fast becoming a war zone, *How to Avoid Being Killed in a War Zone* will help you survive some of the world's most volatile environments. Well-traveled journalist Rosie Garthwaite offers practical advice drawn from her own personal experience and that of others, including many seasoned colleagues who have worked in some of the world's most hostile regions. Topics covered include everything from avoiding land mines and hostage situations to amputating a limb and foraging for safe food. The book is a true survival manual; all medical advice has been vetted by doctors from Doctors Without Borders, but it is also a transporting read filled with vicarious thrills and written with brio and humor by a woman who has seen it all.
